Below are the minimum age requirements to manage your own Google Account. Note: For younger children, parents can help create and manage a Google Account with Family Link. When a child reaches their countrys minimum age, they can manage their own account. Find your countrys age requirement For all countries not listed below, 13 is the minimum age to manage your own Google Account. Note: These requirements may not be applicable to Google Workspace, including accounts in Google Workspace for Education domains.Asia South Korea: 14+ Vietnam: 15+ Caribbean Aruba: 16+ Caribbean Netherlands: 16+ Curaao: 16+ Sint Maarten: 16+ Europe Austria: 14+ Bulgaria: 16+ Croatia: 16+ Cyprus: 14+ Czech Republic: 15+ Denmark: 15+ France: 15+ Germany: 16+ Greece: 15+ Hungary: 16+ Ireland: 16+ Italy: 14+ Lithuania: 14+ Luxembourg: 16+ Netherlands: 16+ Poland: 16+ Romania: 16+ San Marino: 16+ Serbia: 15+ Slovakia: 16+ Slovenia: 16+ Spain: 14+ South America Chile: 14+ Colombia: 14+ Peru: 14+ Venezuela: 14+ Service-specific age requirements Some Google services have specific age requirements. Here are a few examples: YouTube: When a YouTube video has been age-restricted, a warning screen is displayed and only users who are 18 or older can watch it. Learn more about age-restricted videos. AdSense: 18+ Google Ads: 18+ Disabled account due to age requirement Across Google services, if we learn that you may not be old enough to have a Google Account, you'll have 14 days to update your account to meet age requirements or your account will be disabled. Your first step is to set up an Analytics account, unless you already have one. Skip to creating a property unless you want to create a separate account for this website and/or app. For example, you might want to create another account if this website and/or app belong(s) to a separate business. Go to . If this is your first time using Google Analytics, click Start Measuring. If you already have an account set up, go to step 2. In Admin, click Create, then select Account. Note: The previous link opens to the last Analytics property you accessed. You can change the property using the property selector.You must be a viewer or above at the account level to create an Analytics account. Provide an account name. Configure the data-sharing settings to control which data you share with Google. Click Next to add the first property to the account. Use Google Analytics to understand the full customer journey, from first visit to purchase. You need the Editor role to add properties to a Google Analytics account. If you created this account, you automatically have the Editor role. You can add up to 2,000 properties (any combination of Universal Analytics and Google Analytics 4 properties) to an Analytics account. To raise this limit, contact your support representative. To create a property: Are you continuing from "Create an Analytics account", above? If so, skip to step 2. Otherwise, in Admin, click Create, then select Property. Enter a name for the property (e.g. "My Business, Inc website") and select the reporting time zone and currency. If a visitor comes to your website on a Tuesday in their time zone, but it's Monday in your time zone, the visit is recorded as having occurred on Monday. If you choose a time zone that honors Daylight Savings Time, Analytics automatically adjusts for time changes. Use Greenwich Mean Time if you don't want to adjust for Daylight Savings Time. Changing the time zone only affects data going forward. If you change the time zone for an existing property, you may see a flat spot or a spike in your data, caused by the time shift forwards or backwards, respectively. Report data may refer to the old time zone for a short period after you update your settings, until Analytics servers have processed the change. We recommend that you change the time zone for a property no more than once per day so Analytics can process the change. Click Next. Select your industry category and business size. Click Next. Select how you intend to use Google Analytics. Google Analytics tailors the set of default reports based on the information you provide about how you intend to use Analytics. For example, if you choose "Generate more leads," you will see a collection of reports to help you measure lead generation. Learn more about the business objectives reports collection. Click Create and (if you are setting up a new account) accept the Analytics Terms of Service and the Data Processing Amendment. Continue to Add a data stream to start collecting data. Add a data stream Are you continuing from "Create a property", above? If so, skip to step 2. Otherwise, in Admin, under Data collection and modification, click Data Streams. Note: The previous link opens to the last Analytics property you accessed. You can change the property using the property selector.You must be an Editor or above at the property level to add a data stream. Click Add stream. Click iOS app, Android app, or Web/iOS app or Web/iOS app When you add an app data stream, Analytics creates a corresponding Firebase project and app data stream, and automatically links the Firebase project to your property if your project and property are not already linked. You can link to an existing Firebase project, however you have to do this from Firebase (and for a GA4 property that is not yet linked with Firebase.) Learn how. Enter the iOS bundle ID or Android package name, the app name, and for iOS, the App Store ID, then click Register app. Click Next and follow the instructions to download the config file for your app. Click Next and follow the instructions to add the Google Analytics for Firebase SDK to your app. Click Next. Run your app to verify installation of the SDK and that the app is communicating with Google servers. Click Finish. (Alternatively, click Skip this step if you want to complete app setup at a later time.) Web Watch a step-by-step video to see how to set up Google Analytics on your website using Google Tag Manager. Set up data collection To begin seeing data in your new Google Analytics 4 property, you'll need to do one of the following: Add the tag to a website builder or CMS-hosted website (e.g., HubSpot, Shopify, etc.) Many CMSs have native integrations with Google Analytics 4. If you're using one of the CMSs listed below, follow the instructions to find your Google tag ID and paste it into the Google Analytics field that your CMS provides. To find your Google tag ("G-") ID: In Admin, under Data collection and modification, click Data streams. Note: The previous link opens to the last Analytics property you accessed. You can change the property using the property selector.You must be an Editor or above at the property level to create. Click the data stream for your website. Under Google tag, click View tag instructions. On the Installation instructions page, select Install manually. On the screen, you'll see the JavaScript snippet for your account's Google tag. Your Google tag is the entire section of code that appears, beginning with: and ending with: and ending with: Paste your Google tag to your website using your CMS's custom HTML feature. Follow your CMS's instructions on how to do this below: Cart.com: Contact Cart.com support for instructions. PrestaShop: Contact PrestaShop support for instructions. Salesforce (Demandware): Contact Salesforce support for instructions. VTEX: Contact VTEX support for instructions. Weebly instructions Data collection may take up to 30 minutes to begin. You can then use the Realtime report to verify that you're receiving data.Add the Google tag directly to your web pages You need access to the HTML for your web pages. Ask your web developer to perform these steps if you're unable to complete the steps yourself. In Admin, under Data collection and modification,click Data streams. Note: The previous link opens to the last Analytics property you accessed. You can change the property using the property selector.You must be an Editor or above at the property level to create. Click Web. Click the data stream for your website. Under Google tag, click View tag instructions. On the Installation instructions page, select Install manually. On the screen, you'll see the JavaScript snippet for your account's Google tag. Your Google tag is the entire section of code that appears, beginning with: and ending with: Paste your Google tag immediately after the on each page of your website. Data collection may take up to 30 minutes to begin. You can then use the Realtime report to verify that you're receiving data. Don't see a Data Streams option in the Property column? You are in a Universal Analytics property instead of the GA4 property that you just created. Use the property selector or Admin to navigate to your new GA4 property. Add your tag using Google Tag Manager To set up data collection for an app, read these instructions. Next steps After you have set up data collection, complete additional configurations to get more useful data out of Analytics. Review the checklist to learn which configurations are right for you to collect more data, filter unwanted data, and power advertising. To sign up for Gmail, create a Google Account. You can use the username and password to sign in to Gmail and other Google products like YouTube, Google Play, and Google Drive. Important: Before you set up a new Gmail account, make sure to sign out of your current Gmail account. Learn how to sign out of Gmail. From your device, go to the Google Account sign in page. Click Create account. In the drop down, select if the account is for you: Personal use Child Work or business To set up your account, follow the steps on the screen. Create an account Tip: To use Gmail for your business, a Google Workspace account might be better for you than a personal Google Account. With Google Workspace, you get increased storage, professional email addresses, and additional features. Learn about Google Workspace pricing and plans. Try Google Workspace The username I want is taken You can't create a Gmail address if the username you requested is: Already being used. Very similar to an existing username. For example, if example@gmail.com already exists, you can't use example@gmail.com. The same as a username that someone used in the past and then deleted. Reserved by Google to prevent spam or abuse. Someone is impersonating me If you believe someone has created a Gmail address to try to impersonate your identity, you can: Unfortunately, Gmail is unable to participate in mediation involving third parties regarding impersonation. Learn more about Gmail Terms of Use. Related resources How do I create a new Google Account? Sign in to Gmail Post to the help community Get answers from community members You can choose to create a Google Account in Chrome or any browser. You can manage your Google Account by browsing to myaccount.google.com. If you're signed in to Chrome with your Google Account, you can also manage your Google Account from within Chrome. When you create or manage a Google Account, you can take actions such as: Edit personal info, such as your name, email address, phone number, physical address, or profile photo. Learn more. See your data, activity, and preferences that can make Google services more useful to you. Learn more. Manage your saved Google Account contacts. Learn more. Keep your Google Account secure. Learn more. Post to the help community Get answers from community members You can create a Google Account for your child under 13 (or the applicable age in your country) and manage your child's Google Account with Family Link. With a supervised Google Account, your child gets access to Google products like Search, Chrome, and Gmail. You can set up parental controls to help supervise them. If your child is above the age of 13 (or the applicable age in your country), they can create their own Google Account. Once your child has their own Google Account, you can add supervision and set up parental controls through Family Link. You or your child, if they're above the age of 13 (or the applicable age in your country), can stop supervision at any time. If your child stops supervision, you'll be notified and your child's supervised devices will be temporarily locked. Learn more about how to add and manage supervision on a current Google account. If your child uses a Pixel Tablet and is below 9 years old, you can create a Google Account without a Gmail address and password. If you want to add a functional Gmail address to your child's account, you can do so at any time. Tip: You may need to add a Gmail address and password to your child's account to enable them to access certain apps and services. You can upgrade your child's account from a blocked app or through Family Link. Create an account It takes about 15 minutes to create your child's Google Account. Go to the create your Google Account page. To create your child's account, follow the on-screen instructions. You'll enter info like your child's name, the email address they want, and their birthday. To provide parental consent for your child's account, sign in with your own Google Account and choose your preferred way to give consent. Tip: When you've made the account, you get a confirmation on the screen. On a new Android device Follow these steps to create a Google Account for your child under 13 (or the applicable age in your country) when you're setting up a new device running Android 5.0 and up. Turn on the new device and follow the instructions on screen to set up the device. When you're asked to sign in with your Google Account, tap Create account. If you don't see "Create account," tap More options For my child. Enter your child's name, birthday, gender, email address, and password. Follow the instructions to sign in with your own Google Account, provide parental consent, and pick your child's settings. On a new Chromebook Follow these steps to create a Google Account for your child under 13 (or the applicable age in your country) when you're setting up a new device running ChromeOS M128 or up. To set up your device, turn it on and follow the on-screen instructions. When you're asked to choose your Chromebook's setup, select For a child Next. Select Child's Google Account Next. Select Create a Google Account for a child Next Yes, continue. Enter your child's name, birthday, gender, email address, and password Follow the instructions to sign in with your own Google Account, provide parental consent, and choose your child's settings. Follow these steps to create a Google Account for your child under 13 (or the applicable age in your country) to sign them into an existing device running Android 5.0 and up. Note: Instructions for adding and removing accounts on the device will vary. If the instructions below don't work, search your device's help center for more information. Remove any existing accounts on the device. Delete any apps, photos, or other data from the device you don't want your child to have access to. Follow the steps to add a new account to the device. When you're asked to sign in with your Google Account, tap Create account. If you can't find "Create account," tap More options For my child. Enter your child's name, birthday, gender, email address, and password. Follow the instructions to sign in with your own Google Account, provide parental consent, and pick your child's settings. On a new Pixel Tablet Important: To create your child's Google Account without a Gmail address and password, you need to sign in with your Parent account first. Turn on the Pixel Tablet and follow the on-screen prompts to set up the device with the Parent account. Go to Settings. Tap System Multiple users. Turn on "Allow multiple users" Add child. When prompted, tap Yes, continue. Enter your child's name then tap Next. Enter your child's basic information then tap Next. You'll get the option to continue with or without a Gmail address. Select Yes, continue without one and follow the on-screen prompts to choose a profile picture. Review the privacy information. To provide consent, enter the password tied to your parent Google Account, then tap Next. Review settings for Parental Control then tap Next. Review screens, then tap Next. When you're done, you'll get an on-screen confirmation. Tip: See something that looks like an email address (@gmail.com)? This is auto generated to help us provide your child services and is not a valid email address. Create an account with a Gmail address & password You can give your child access to Google products like Search, Chrome, and Gmail when you create a child account with an email and password. Turn on the Pixel Tablet and follow the on-screen prompts to set up the device. When asked to create a Google Account: Tap Create account For my child Let's go! Enter your child's name, birthday, gender, email address, and password. Follow the instructions to sign in with your own Google Account, provide parental consent, and pick your child's settings. When you're done, you'll get an on-screen confirmation. Troubleshoot problems I want to upgrade my child's account with Gmail and password You can upgrade your child's Google Account to include a Gmail address and password so they can access more features. When your child tries to access a blocked app, they'll get the option to tap "Ask a parent" or "Ok." If they select "Ask a parent," you can upgrade the account through your parent account. Upgrade your child's account from their device When your child tries to access a blocked app, they'll get the message "Your parent will need to add a Gmail address and password to your Google Account." Tap Ask a parent. When prompted, tap Parent is here. Select your Parent account. Enter your password. Enter your child's basic information, then tap Next. Follow the on-screen prompts to create a Gmail address and password for your child. Tap Next. Review the privacy information and provide consent. When you're done, you'll get an on-screen confirmation. Upgrade your child's account from your device When your child tries to access a blocked app, they'll get the message "Your parent will need to add a Gmail address and password to your Google Account." Tap Ask a parent. On your child's device, ask your child to tap Parent is not here Yes, email my parent. The child's device gets a notification that an email has been sent. Tap Ok. On your parent device, find the email and tap Create Gmail address. If you're prompted to, add your child's Date of birth. Follow the on-screen prompts to create a Gmail address and password. Review the privacy information. To provide consent, enter the password tied to your Google Account and tap Next. Tap Done. I was charged a fee to set up my child's account To create a Google Account for your child, you're required to give parental consent. One way to provide consent is by using your credit card. While you won't be charged a fee, a temporary authorization may be placed on your card to verify that it's valid. In most cases, temporary authorizations are removed from your account within 48 hours. To sign up for Gmail, create a Google Account. You can use the username and password to sign in to Gmail and other Google products like YouTube, Google Play and Google Drive. Important: Before you set up a new Gmail account, make sure that you sign out of your current Gmail account. Learn how to sign out of Gmail. From your device, go to the Google Account sign-in page. Click Create account. In the drop-down, select if the account is for you: Personal use Child Work or business To set up your account, follow the steps on the screen. Create an account Tip: To use Gmail for your business, a Google Workspace account might be better for you than a personal Google Account. With Google Workspace, you get increased storage, professional email addresses and additional features. Learn about Google Workspace pricing and plans.
