Terraria how to defeat the destroyer

Terraria - How to Kill the Destroyer (Boss Guide) Terraria Guides: Beginner's Guide, Jeepers Creepers Achievement Guide. Guide ContentsThe DestroyerStep #1Step #2Step #3 The Destroyer Hello, If you are reading this, you are most likely struggling on The Destroyer. If you would like to make the fight easier, please continue reading. Step #1 An arena can be very important to decide the outcome of a fight. A good trick is to use platforms to make a straight line where you can shoot from below you. If you need more description use the image below as a reference. Step #2 Use accessories and gear the matches your main class. For example, don't have mage accessories but ranger armor. You will end up weaker on both sides. Also make sure you have the maximum amount of hearts and life fruit if you are still struggling. Dont do this: Do this: Step #3 The Strategy. With Destroyer, it is a worm like boss that is apart of the 3 mechanical bosses. It does not split apart like the Eater Of Worlds boss. It is summoned at night and will disappear when daylight comes. It can also be summoned randomly on any night after at least 1 Demon Alter/Crimson Alter has been smashed. There is also probes that summon from attacking the Destroyers body. It shoots red lasers at you. The Destroyer has 80,000 HP in normal mode and 120,000 HP in expert, however; it will be buffed depending on if you have other players in the world with you. The best strategy with this arena, is to fire piercing bullets at him and dodge when he comes up through the platforms. A Starcannon or some types of arrows, aswell as a good sword can make this boss easier. You May Also Like: Terraria – Beginner's Guide Terraria – Surviving Your First Night (Tips & Tricks) Terraria – New Player Beginner Guide (Tips & Tricks) Terraria - How to Kill the Plantera (Boss Guide) Terraria – Compact Housing Complex (All NPCs) 1 Understand who Destroyer is. He is a boss similar to Eater of Worlds, since they both share the Worm AI. However he is much thronger and thicker. Each unit of his body has a red flashing light, which eventually detaches and becomes a Probe that fires lasers at you. Once defeated, he drops Souls of Might and some Hallowed Bars. 2 Gather equipment. Get Titanium Armor/Adamantite Armor with helmet depending on your class choice or Frost Armor/Forbidden Armor if you are able to farm Frost core/Forbidden Fragment. You will need at least 12 greater healing potions, which can be crafted from 12 bottles of water, 12 Pixie Dust, and 4 Crystal Shards. 3 Gather weapon. For melee users, You could try Adamantite Glaive/Titanium Tridents, Dao of Pow, Hel-Fire or Fetid Baghnakhs. Ranged users can use Onyx Blaster, Daedalus Stormbow, Dart Pistol with Crystal Darts or Dart Rifle with Cursed Darts depending on your world's evil. Most magic weapons that are piercing should be viable for magic users. 4 Spawn him in. You need to make a Mechanical Worm, which is crafted from 6 rotten chunks, 5 iron bars, 5 copper bars, and 7 Souls of Night. He can only be spawned at night. 5 Destroy him. He spawns off screen, so be ready and waiting. Destroyer likes to get underground and zip up at you at an almost straight vertical angle. From then on, just attack him and his Probes until he dies. If your health gets low, drink a Greater Healing Potion. If your health gets really low and the cool-down for healing potions isn't up yet, then teleport home with Magic Mirror/Recall Potion to the nurse and heal up. Be careful if you do, because he might kill a few of your NPCs. 6 Done! Once he's dead, he drops Souls of Might, which can be used to craft Excalibur, Megashark, and other useful items.. Add New Question Question What would be an easy way to kill the twins? (Terraria Mobile) When dealing with Retinazer, get as close to him as you can and hit him with a flail, like the Dao of Pow (the weapon mentioned earlier). With Spazmatism, his balls of cursed flame usually miss, but when he does his flamethrower attack, fly very high and shoot down at him with a megashark (a heavy machine gun). Question I can't seem to beat this on mobile, and I have a hard time getting better stuff. I have full titanium armor and I use the titanium repeater and the minishark with cursed bullets. What else do I need? Try a flamethrower, because the first stages of each are flammable. If you really want to use a gun, use chlorophyte bullets, if possible. Question How do I get the flame thrower in Terraria? You'll have to destroy Skeletron Prime to get the Souls of Fright, get the Arms Dealer for the Illegal Gun Parts and mine for Iron / Lead Ore for their respective Bars. Craft it at a Mythril / Orichalcum Anvil. Question Do I need a mythril anvil to destroy the Destroyer on Terraria? If you need better gear, then yes. A mythril anvil can help you craft titanium swords and tridents and armor, as well as cobalt and mythril gear. I advise titanium or adamantite gear. Question What is the best way to get Souls of Night on mobile? Kill a lot of corrupt or crimson mobs and clone the souls. To clone, you need to create a backup account. It is faster with the more the numbers of souls you have to clone with. Question How do I make adamantite bars in Terraria? You need adamantite ore or titanium ore and a hellforge. Combine these ingredients to make a titanium or adamantite forge, with your new forge you can make adamantite, titanium and most other hard-mode ores into bars. Question What weapons and armor do I need to beat The Destroyer on Terraria? Try using the cannon, which you get by defeating the Pirate Invasion. You will get a pirate NPC, then you can buy the cannon. You will need at least 500 cannonballs. Question Who drops soul of flight? Wyverns drop them in the sky biomes, typically found above the tall living wood trees. Question How do I get all of the souls in Terraria? The souls are Light, Night, Flight, Fright, Might, Blight, and Sight, which are dropped from Hallowed enemies, or any enemy rarely during the day, corrupt/crimson enemies, or any enemy rarely at night, Wyverns, Skeletron Prime, The Destroyer, Ocram, and The Twins, respectively. Question How do I kill the Moon Lord in Terraria? The best way is to use an Ultra Terra Blade, it deals the most damage, so it won't take long to defeat the Moon Lord. Guide Category Boss/Events I know there are a lot of people out there looking for help on the destroyer fight.This is a guide I've been wanting to releasae for a while now.So here we go Step 1: Don't make an arena! instead,make a box.You can fit a house for the nurse if you want't but you don't need to.In that box, fit a campfire,heart lantern,and a bit of honey.The reason why we are making this box as it block the probes and thier lasers from hitting you.you should also make another room so you can block the destroyer's lasers when it comes through. Step 2erepare your buffs and weapons. for melee: shadowflame knife and chain guillotines for ranger:daedalus stormbow for mage:cursed flames or crystal storm for summoner:blade staff and firecracker/durendal if you have enough hallowed bars from another mech My recommended weapons: deadulus stormbow (obviously) and cursed flames + firecracker and an imp staff Step 3: Summon the destroyer,drink your buffs,and start attacking the destroyer when it comes inside.For summoner you can attack the destroyer even outside the box with whips.When the probes come in,take a second to kill them and the keep attacking.This way,you will pick up the hearts and mana stars that the probes drop. Hopefully this guide was useful for you! Credits:happydayz When you build the box how are you gonna avoid the destroyer attacks The Daedalus Stormbow is incredibly useful for all of the mechanical bosses, especially the Twins. The Daedalus Stormbow is incredibly useful for all of the mechanical bosses, especially the Twins. How is it post-nerf? I remember it being entirely overpowered and then I remember something about a nerf. Anyhow, for Destroyer I can offer a couple more solutions: 1). Use Adamantite Melee Armor with Ironskin+Rejuv potion and a band of regeneration. Probably overkill, but that + campfire+heart lantern nearby you don't need an arena, or a box, or a nurse. 2). If you have Crimson, fish up a Bladetongue. A Bladetongue can kill the Destroyer in about 45 seconds (sometimes less if you get lucky). If you also have a cross necklace, you will only get hit about 36 times, assuming you are actively getting hit every second (which should not be the case). The lasers deal 40-50 damage (depending on if the lasers came from the body or probes). The body does 55 damage. 3). Adamantite Armor (Melee) has a Defense of 46. This, Plus an Ironskin Potion gives you 54 Defense. This means that assuming you do not have any Warding accessories, you will have 56 Defense with the Obsidian Shield which gives you 28 damage reduction. The Lasers will then deal 12-22 damage per hit and the melee attacks will deal 27 damage. 4). If you have 400 health + Greater Healing Potion (which is +100 health), you effectively have 500 health, not counting regen. 5). This means that at 27 damage per hit, every 1.33 seconds (which is 18 DPS), it will take the worm 27 seconds to kill you assuming you're getting hit every opportunity. However, during these 27 seconds, you would also have regenerated 4-5HP per second during these 27 seconds which gives you an additional 108-135HP which brings the total time for the worm to kill you to 34 - 35 seconds which is only 10 shy of the time the bladetongue will kill the worm. 6). Adding two warding accessories of any kind reduces it's DPS by 4 making it have 14 DPS which means you would survive 38-39 seconds. Adding four would change this to more than 60 seconds. The basic strategy would be to simply stand in place and only dodge the worm's body and if you can dodge a laser and get a second where you're not getting hit by jumping, that would only extend your time to live. But basically you'd just stand there and hold the mouse button until it dies. You literally can't get any easier than that without building elaborate auto kill arenas or the like. This method doesn't require any building whatsoever other than plunking down a campfire and a heart lantern near you. You could also build a straight solid line of blocks above you to block some of the lasers, but it really isn't necessary. The Fetid Baghnakhs would do this even faster, as well. You could also add a summon for slightly more damage, when I did the -45 second bladetongue kill, I didn't have a summon active at the time. A grindwheel would also be nice here, as would a shark tooth necklace, neither of which I had when I did this last. It is still very good,the daedalus storm bow.Sure,it takes longer to kill but for a main weapon it is still very good against the destroyer.As for weapons,I just put the weapons I have the most experience with the destroyer.I'd say that you could almost forgo any defensive accessories and just keep a bit of armor and you are good.Let's add the fact that some people might have titanium armor and crimson worlds,which has those op shards regenerated by doing damage and the fetid baghnakhs(?).Add that to the fact that you will be very close knitted with the destroyer and you've got yourself and winning combination.the box is the to protect from the millions of lasers that the destroyer will throw at you,and like me,if you are horrible at dodging then this type of method is great. ranger u can also use super star shooter if u defeated other mechs and have stars left, the stars pierce infinitely and each hit hits twice. ranger u can also use super star shooter if u defeated other mechs and have stars left, the stars pierce infinitely and each hit hits twice. this is assuming u are in a box.Weapons like this cannot be used optimally since only a few segments will be running through the box.other weapons that pierce will not be so good either
