## Covenant heritage academy tutoring services

lessons are all in American English. We do work with families where English is not the first language as well and have enjoyed the International connections we have as friends. Tai's first language was Cantonese but has studied the American Phonetic Alphabet as well as other languages and studied the International Phonetic Alphabet at the University of North Dakota through the Summer Institute of Linguistics, on the above to set up Teamviewer on your system and when the time comes to start a Teamviewer request for a session online. After that, we can start a tutoring or technical support session. We have used this successfully to connect with Windows, Macs, and Linux-based systems on laptops and workstations to successfully tutor students and equip them to create knowledge. This application is safe to use. We have worked with Teamviewer for several years aiding clients all over the USA. If you create a gmail account or need assistance with this contact us so that we can assist you. This will open the door for us to share a Google Drive folder on more things that allow us to pass lesson materials to cover and revise and refine later when we have covered such for you to reference. We use Google Calendar to track when we have available times so you can have a view of that. We do try not to tutor on Sundays but are open to emergencies at a higher rate if this happens, but we try not to do this so we can rest on Sundays). Learning is not just for now but for the future. This is why we choose Google to help us edit documents simultaneously, or we can upload a Microsoft Document depending on if that is needed to aid in the tutoring process. Creating a keep allows for later review for exams or quizzes. We can work with you to start this as well as direct you to a Google Calendar for our tutoring services as well. Home>Welcome to Covenant Heritage Academy Tutoring Services!!! We are a private school that works with students K-12, College, and beyond. We can substitute teach, mentor, and tutor in many subjects serving the private, public, parochial, college, and senior students and believe that learning should be a life-long adventure to unravel the mysteries around in time and space connecting our dots of information, understanding and organizing, assimilating, and applying them for Academics and Life. Learning should be a joy and a fun activity to unite your passion to serve not just lead others. Our passion to train mentors so that students who reach this level are learning exponentially how to affect generations of students beyond just learning the facts of a subject. We want to infect and inspire our students with a passion to not just do good things but reach beyond and help as many as possible in their endeavors as well. We can tutor as a family and would enjoy connecting with you with Teamviewer 12 to offer remote online tutoring, or Skype, or Google Drive folder means to help aid you on your systems or you can connect to ours through our business license. Check out our tutors below. Tell us what you need help with. If we can not help, we can refer you to other tutors that are in-house or other. We want to meet your needs on time, however, we choose not to work on Sunday, but we will do our best to be available from 8 am to 10 pm Pacific Standard time. This means you can email us at any time, but we may not be available to respond to you unless you have scheduled time with us individually. We will post our calendars so that you will see our open time slots. We enjoy one-on-one tutoring and think that is the most effective means, yet we can consult with each other to provide you with a wider field of expertise as well. We have been active with the Shooting Stars 4-H in Stanislaus County as volunteers, where Tai offers projects focused on S.T.E.M. such as Flight with Small Devices, and Computer projects to aid youth and parents to become safer on the Internet as well as join in the Lazarus Project to recycle, reuse, refurbish, upgrade systems for education and load open source systems and software on to older systems rather than have them go to waste. So if you would like to donate equipment to us, we are forming a non-profit to handle this to be of benefit to others. Tai is also working on staff with ModestoAcademy.com as of the summer of 2017 and onward. Check out his classes there as well. We can receive payments through Zelle, Venmo, or PayPal using paypal.me/Tai.Wong, and other means. If you need help with lessons, homework, critiquing your writing assignment, or test preparations, just contact us with an email to Chats2Tai@gmail.com or request to see our tutoring calendar for available times. Hello, Tai can help mentor you in learning styles, study skills, and test preparations for Mathematics, the Sciences, and Technology too! Tai has a degree from Cal Poly in Mathematics with a Computer Science Option and enjoys training youth, parents, and seniors to be comfortable and safer on the Internet as well as mentoring and tutoring students to be successful in Mathematics and the Sciences has been successful in mentoring students of all ages to prepare for the SAT, ACT and GRE, CBEST, CSET, ASVAB, AFQOT, and other exams. To keep your costs down, we want to provide you with the best means to study and help you with overcoming your weak areas. We will refer you to vetted websites that we have worked with that allow us to be the Academic coach provided you specify us as such. We want the best for our students and their parents to connect with us locally as well as remotely to provide safety and instruct in being safer on the Internet as well. Let us know your student's learning styles, interests, academic, and career objectives as well as which subjects they need help with so we may be able to tailor our efforts to aid them successfully to focus in fun and memorable ways. We can offer remote online tutoring and can receive your attachments to prepare ahead of time tailored lessons or work with you dynamically as we receive them as well. However, when we do receive them ahead of time and know your deadline for needing help we can connect with your system using Microsoft Office 2003, 2007, 2013, 2016, and 365 applications, Open Office, Libre Office, or other applications on your system to store lessons in Google Drive folder (with items in Google Documents, Sheets, or other means to help with colorful notes for each session) as long as you have a Gmail account (which is free and easy to set up). If you do not have a Gmail account, then we can help you set that up as well. My goal is to offer unique mentoring and tutoring to build meaningful facts, connect the dots to bring understanding, and with persistence bring about competency in seeing how the languages of order express themselves in Mathematics, Physics, Chemistry, and other Sciences. All of creation has a high order of consistency and conformity to intelligent design, hence we can make use of it. I have a degree in Mathematics with a Computer Science Option and enjoy training youth, parents, and seniors to be comfortable and safer on the Internet as well as mentoring and tutoring students to be successful in Mathematics and the Sciences. A holistic approach to understanding the primary learning style of the student and that of the area of study may benefit from retraining the student to be aware of other learning styles as well as mastering the subject material. Hello, my name is Kathy Wong, I can help with English, Literature, Music, Writing, and Reading. Kathy is a Voice Major. Has led the Modesto Home School Choir as well as the Grace Church Choir in Modesto, California. She enjoys helping children of all ages and helps with training students to write well and enjoy literature, music, history, and the humanities. She is a graduate of Western Illinois University. She too has passed her CBEST to substitute teach in California. Kathy and Tai, both, passed not only the CBEST but also helped another Stanislaus State University Student to be trained well enough to pass her CSET. She did well enough to merit teaching this last summer and hopes to pursue teaching K-12 as well. We are Covenant Heritage Academy Tutoring Services because we are of a covenant whose heritage predates our academy, where tutoring serves one greater than our existence. There is a Creator in whose image we are created so that we might glorify Him and enjoy Him forever. Though we may fail Him, He has provided a means of salvation, and He is the Way, the Truth, and the Life. If you want to have a group of 4 or more students, ask for a group discount. We want to reward you for helping us teach more students by giving a price break. Your reaching out to others to aid us in group remote session times helps us all to gain. Tai was great to work with. He was able to connect with me online and walk me through all my math lessons to help me learn and prepare for my exams. The class I took was extremely difficult and I am not good at math at all yet was able to learn from Tai to help me pass my class and graduate. You won't find a more dedicated tutor willing to help you succeed. I would highly recommend Tai for any class you need help in. Great guy with great morals. I know I will be using him again. 02/25/2016 Tai is an excellent tutor and is adept at teaching students through a variety of learning styles. He has worked with foster children with special challenges and successfully completed many projects with them. He has proficiency in a variety of subjects. He has taught children of all ages in reading, math, science, English as well as chess and woodworking, computer science and programming... I highly recommend him. He is dependable and personable. 01/19/2016 Tai is great. He taught me to be safer on the Internet and how to use my Windows 10 Laptop along with Google Earth Pro and more. 01/10/2016 I definitely recommend Tai Wong for the position of a tutor! He tutored me in the areas of math and science while I was earning my degree in elementary education. He also helped me pass tests in these subjects so that I could earn a teaching credential. He is friendly, patient and very knowledgeable. He makes learning engaging and fun; he believes that every person can learn and that there is no such thing as a "dumb" question. I recommend him for working with any age group for math, science and computers. 01/02/2016 Knowledgeable, patient, and diligent - Covenant can tutor in all sorts of subjects. Reply from Covenant Heritage Academy Tutoring Services If you would like more educational enrichment sessions with any of your family members or even technical support, repair, maintenance, support, or training assistance, please do not hesitate to call. We enjoy helping keep our clients safer on the Internet and less encumbered with their browsing from ads popping up. So enjoyed explaining to your family how their modem gets information from the Internet Service Provider (ISP) via a cable into the house to work with Modem Modem to modulate the information so that Rollie Router could roll out and keep straight packets to talk with each device such as Dave Desktop or Larry Laptop and others. It was fun to straighten out the ISP to your home so you could be away and your family could get their Internet working. Also enjoyed helping with the woodworking, origami, and chess lessons. Would you like more lessons for the younger members on Lego Engineering and Robotics or Kodu programming (3-D gaming) in the future? Let us know. St. Peter After School Study Center 3461 Merle Ave. Modesto, CA 95355 3304 Scenic Dr. Modesto, CA 95355 Beta's Tender Love and Care 2307 Oakdale Road. Modesto, CA 95350 If you want to have a group of 4 or more students, ask for a group discount. We want to reward you for helping us teach more students by giving a price break. Your reaching out to others to aid us in group remote session times helps us all to gain. Origami is historically a static form or art starting from a square of paper. My goal in creating puppets from origami was to help make stories come alive and help the listeners to keep their hands busy so they could focus more. The thought of teaching how to make puppets and use story telling to aid with how to make the puppets was an easy step in the same direction and seemed to just be the precursor to aiding others to enjoy puppet making and story telling. Please check out my Facebook Page dealing with Puppet Origami Story Telling (POST) to see how to make Jonah and the GAAT Fish. Helping others to enjoy origami also aids in an exploration in art, paper engineering, geometry, and much more. Paper comes in standard sizes and with some ingenuity, we can find other ways to make paper and purchase larger archival pieces to work with even larger creations to make it more cost effective for students, families, and others. I will try to create a cache of videos in the future to share creating Jonah and the GAAT Fish but for now, look at Facebook for my postings. Tai Wong 209-996-3087 Chats2Tai@gmail.com Kathy Wong 209-548-0245 Kathy.Wong@gopcmoesto.org We also have other tutors we recommend based on skills and expertise needed. Please use our contact information for tutoring purposes and under the following guidelines: our Google calendars are used to setup tutoring sessions and show our availability with a Google gmail account (we can train you to set up our cell numbers are used for our business so you can text us to set schedules please do not call us unless we invite you to do so to avoid conflicts with other students we tutor) we also use Skype and Facetime for our remote and local students we like to invite you to download Teamviewer 12 from www.teamviewer.com we have a business license with Teamviewer so you can download it free use teamviewer to aid our students and other groups we mentor as well it can be installed for personal use (for your own use) commercial use (to use with us) Teamviewer allows us to aid you to allow us to see your screen and aid with any technical issues if your system can load teamviewer and we can access it on the Internet, we may be able to remove malware/spam (methods to deal with a Gmail strategy/adware (means to remove intrusive ads and recommend extensions based on your browser preferences/phishing ruses (mentor against if you switch sides, you can access our systems to aid with a variety of resources we can tutor you with resources that you may not have but want to learn about before purchasing we can vet websites and recommend sites that are safer Help us help you schedule time with your academic solutions. Please use Skype with A1.Tai.Wong or Facetime or or //www.teamviewer.com/en/download/previous-versions/?\_ga=2.226165850.1323090626.1534511321-834604261.1533214999#verson12?\_ga=2.226165850.1323090626.1534511321-834604261.1533214999 The above link allows you to install Teamviewer Version 12 on most platforms so that Tai or Kathy can connect online with you for your tutoring/mentoring subject. Teamviewer is the best means for remote assistance if you are a remote student or a local to Modesto, CA student, needing help but can not meet physically at a convenient time and location. If you are local to Modesto, or far away, please check our Google calendar for availability We try not to tutor on Sunday, but please do send information at anytime. We can use Google Drive or One Drive to store collaborative notes to help you in your subject areas. If you are a new client, we do intend to assess your learning styles, interests, and offer a free hour in a two-hour session, so that you can judge if remote tutoring or local tutoring is required in your situation. In this day and age, it is important to be able to learn in fun and accelerated ways. We seek to aid in these means and hope you will give us an opportunity to bring success in academics into your life. Please send your assignments ahead of time, with contact information, due dates, syllabus if you have one. If you need mentoring on more than a course, please describe your goals. Payment is required after each session, through Care.com, paypal.me/TaiWong, or other means predefined. We do require notification if you can not make a session, so that we can make good use of our time, or find another client to serve. Should we find you are unfaithful in notification there may be a small fee for cancellation. What are learning styles? If you are visual, you may be able to remember information by viewing it to get it into your head but if you hear it, it may not connect unless you can see it. Tactile, you need to learn by manual means. If you see it but do not do it yourself, it won't stick. But if you do it after, then it sticks. Seeing it done, just does not work for you and you need to do it as well. auditory, is when you hear it is great and you get it. But if it is on the board or just written down for you to read, it does not connect with you. You remember the stories and whatever the instructor says but just do not remember it when a test comes around. Learning is not just for the first time. Rehearsing for a test or practicing with homework is supposed to help you to become more skilled and proficient in mastering the subject matter. In order to learn well, like playing piano it may take practice so tactile and auditory skills along with visually are needed to replay great pieces. Some skills such as oratory are a combination of learning and coping styles as well. We use our styles that are an extension of ourselves and they also can be improved upon through time and practice. Athletes rehearse running and winning to get the peak performance at meets. Similarly, we can practice what brings about success. We can test your learning styles and take advantage of your interests to present session information to aid you from mystery of a subject, gaining the facts of it, connecting the dots of understanding, and take you to wise application of the material of a subject. We also teach/mentor/tutor our students to focus, try to learn other styles, plan and schedule their time wisely so that tests, homework, finals, and reports can be sent as reminders on Google calendar to keep on track. We train with a Gmail account how to store notes in colorful ways to aid the visual learning when helpful. In third grade I memorized the multiplication tables up to 25 and then my brothers handed me a "Reviewing Trigonometry" book the same year. Some information can be memorized. Books and people can help us to stay on track and become proficient and be able to master it for future uses. When I teach Math to students, I ask them to send assignments, tests, and practice tests and what their instructor expects them to know such as the class syllabus, assignment due dates, test dates, midterm and final dates and when they will be taking the PSAT, SAT, ACT or GRE. We hope to aid them to prepare for academics. If the student is thinking of going into the Military, we also help with the GED, ASVAB, and other tests as well. We help students to have fun learning as well as help them to learn with other styles as well. I focus on Math, Science, Computer Software, Linguistics, Speech, Chess, Philosophy, Technology and more whereas my wife handle all other subjects and we do overlap.
