You know the others? -Scramble words is great for native speakers who try to keep acute, but also for those who learn English, since it encourages learning in a gamble way! -The mind is a curious being â€”To overturn the letters through the switch on the bottom left of the game will frequently reveal the words you have never seen. Good luck, and hope you enjoy playing this free online game of Word Scramble! By Ken Michaels, guest writer in the game Shakepeare - â€”hamlet, â€”Call Prince Poland, â€”What do you read, my lord? â€”It is not at all satisfied with what is Reading, Hamlet responds, â€”æwords, words, words. - Previously I described the communication model in which a sender encodes a message and then sends it via a channel (or medium) to a receiver, which decodes the message and, ideally, understands what was sent. Surely the most common way of coding a message is in choosing the most appropriate words for the listener or reader. In the case of Hamlet, he did not like what he read that described it elementary, as simple words, rather than a message. So I thought I'd give a little link to the words themselves. â€”The words have specific meaningful words that end in nym describe the classes of words. Some of the most frequently used nym words are synonymous (meaning the same as); antonimo (means the opposite of); the same sound of the same name; and acronym (a word derived from the first letters of a more complex term, such as the scuba or AIDS). Homo means â€”osame, â€”and hetero means â€”â€”Different.â€”So, if there are homonims, it is going to reason that there are also etheronims. While omonyms have the same sound but different spells (such as pair and similar pear), etheronims are written the same but have different meanings and, often, pronunciation: a sewing person is a sewer, but a repository for waste products is a sewer. Fogna, therefore, is an etheronim. But the vocabulary of the words nym does not end here. One of the websites I visited recently 2 lists no less than 26 nym words, many of which are quite arcane and of interest to relatively few. Some are definitely fun. Do we really need a word to mean another word of two identical parts? If yes, then tutu, pawpaw, yo-yo, and hello are the tatuonimi. A couple of weeks back, my son asked me what you mean for aYou don't know, so we looked at him. In retrospective, I should have been able to logic it, as â€”â€”Meta" means changing. A Mestonimo is a word that designates something from a word that is associated with it. For example, Hollywood is a Metalmetto Used to Indicate the Us Motion Motion Industry, While Crown Refers To The Royalty's Bottle Refer to Alcohol. My use of the expression "A small ink ... a couple of paragraphs back is also a Methimo for written communication, even when no no ink or writing on paper. The point of all this has to do with precision in the use of our language. I don't need to encode a message using a word like metonym, or heteronym, or tautonym, unless I'm sure my listeners (or readers) know what it means. Either that, or I'm willing to add the definition to their advantage, in which case I could have used the definition from the beginning. However, learning the proper use of words, however arcane, can be helpful, and if you like the words themselves, even fun. What's your idiot? In his book "The Half-Life of Facts: Why Everything We Know Has an Expiration Date", Samuel Arbesman<sup>3</sup> discusses the changes of language that occur over time and the two camps that see this phenomenon differently. He explains prescriptive grammar as one that focuses on how words should be used, and descriptive grammar as one that cares most about how they are actually used. Arbesman says that each individual develops his own set of rules on how to use words, and that all of us, you, me and everyone else, have our own personal idiot. This delightful term describes our unique language and way of speaking, determined by what we learned when we were young and by those around us, and includes our grammar, vocabulary, pronunciation of words and even our accent. There's an important lesson here. If we really want to communicate effectively, we need to be aware that every time we encode a message, someone whose idiocy is significantly different from ours could decode it to get a completely different message. So you should be careful about your choice of words; is it really a message, or just "words, words, words"? © 2013 Ken Michaels. All rights reserved.
