Device driver interview questions and answers pdf

Device driver interview questions and answers pdf. Linux device driver interview questions and answers pdf. Windows device driver interview questions and answers. Linux device driver interview questions and answers.

42. Why have you been out of work so long? What is the difference in features between kernel 2.2, 2.4 and 2.6? What is rwlock and spinlock? How do you get the list of currently available drivers? 43. What are character devices? Whom do you compare yourself to? MMAP & brk? 32, 33. Tell the relation between Malloc and MMAP 37, 6, 23. What is object file and what are symbols? Difference between Timer Softirq and Tasklet Softirq? Does gcc search for both static and shared libraries? What challenges are you looking for in a position? Example of using MMAP and MUNMAP in C? When were you most satisfied in your job? What is the difference between insmod and modprobe? 7, 9. What are Kconfig files? What is your dream job? 27, 11, 44. What is the use of register_chrdev and unregister_chrdev? What is dynamic linking? 20. How does this job fit in with your career plan? Why are you leaving your job? How will you trace the system calls made into the kernel of Linux? 28. What are the two types of device drivers from VFS point of view? How will you list the modules? Device Drivers frequently Asked Questions by expert members with experience in Linux Device Drivers. or Why can't we use malloc in kernel code? 17. What is the use of file->private_data in a device driver structure? 18. What is the use of the poll(file, polltable) API? How are interrupts handled in device driver? But many interview questions are to be expected. The commonly asked General Interview Questions How do you handle stress and pressure? Which is searched initially by gcc compiler? Tell the role of brk() in malloc / Tell the relation between heap and brk? How does the character device driver adds and remove itself from the kernel? What motivates you? 8. What can you do for us that other candidates can't? 35. Can you tell the memory layout based on Data,BSS,HEAP and STACK? How will get the driver added into the kernel? Can spinlock/rwlock be used in Interrupt handler? What is a kernel module? What are tasklets? 15, 19. To get more on general interview questions with answers in pdf format, click Download links Download To refer more on Linux Device Driver Interview Questions, go to next page and you can find 1000's of Linux Device Driver Interview Questions, Chapter wise. Too many job seekers stumble through interviews as if the questions asked are coming out of left field. How would your co-workers describe your personality? What is Kmalloc and how does it differ from normal malloc? How do you view yourself? What are the advantages of Dynamic linking or Shared libraries? What type of work environment do you prefer? 3. What should be done for static library based linking in gcc? 16. What have you been doing since your last job? What do people most often criticize about you? 31. Why should we hire you? 4. What happens as soon as a packet arrives from the network in Linux? Briefly explain about both of them? What is task_struct and how are task states maintained? Where do you see yourself 5 years from now? Advantages of MMAP over Read? 21. Describe a time when your workload was heavy and how you handled it. 39. How will you Access userspace memory from kernel? 26. What is the biggest criticism you received from your boss? These questions and answers will help you strengthen your technical skills, prepare for the new job test and quickly revise the concepts Add New Question Linux Device Driver - Interview Questions Introduction Here are the most commonly asked interview questions you can expect to be asked in your interview and advice on how you can craft effective responses. 36. How are they activated? What should be done for Shared library based linking in gcc? 38. When will you use rwlock instead of spinlock? 45, 22, 25. How are you different from the competition? What problems have you encountered at work? What are the ways in which linux kernel can be compiled? MMAP adv & dis-adv. 40. when and How are they initialized? 30. How do you determine the direction of stack growth? 2. What is the use of ioctl(inode,file,cmd,arg) API? Why should I take a risk on you? What are the various methods? What are Static and Shared libraries? Which one have you used? 34, 5. What are the types of softirqs? Do you prefer to work independently or on a team? Tell about the Memory Layout of a Process in Linux . What are you passionate about? Tell about the method/steps in Linux Kernel Compilation. Study this list of popular and frequently asked interview questions and answers ahead of time so you'll be ready to answer them with confidence. How will you make interrupt handlers as fast as possible? What is mmap? What is static linking? What will you do if you don't get this position? 24, 41. Do you have any questions for me? 13. What is the role of interrupts in a device driver? 29. What is a profiler? 10. Describe your work style. 1. How would you describe yourself? MMAP & malloc? What is a device number? 12, 14. Describe a difficult work situation or project and how you overcame it. What is a stack frame, stack pointer & frame pointer?
