Print head alignment canon pixma mg2522

How to print head alignment canon. Pixma mg2522 print head alignment.

Automatic Solution Print Head Alignment
Print Head Alignment If the printed lines are misaligned or the print results are otherwise unsatisfactory, adjust the position of the print head. You need to prepare: two sheets of A4 or flat letter size paper **NOTE** If the remaining ink level is low, the print head alignment template will not be printed properly. Replace the ink tank whose ink is low. See Replacing an ink tank The print head alignment pattern is printed in black and blue. - Aligning the Print Head without a computer You can also align the Print Head without a computer by using the RESUME/CANCEL button. (1) Make sure the power is turned on and two or more sheets of A4 or Letter-size plain paper are loaded into the Cassette. (2) Open the front tray gently and pull out the extension of the front tray. (3) Press and hold the RESUME/CANCEL button until the power lamp flashes green four times, then release it immediately. The print head alignment pattern will be printed and the printer automatically adjusts the print head position. Do not perform any further operations until the printer completes printing the printhead alignment template. Automatic alignment of the print head 1. Make sure the power is turned on. 2. Make sure that two or more sheets of A4 or Letter-size normal paper are loaded into the Cassette. **IMPORTANT** You cannot use the front tray to automatically align the print head. Make sure you load the paper into the Box. 3. Open the front tray gently and pull out the front tray extension. 4. Open the printer driver configuration window. 5. Adjust the position of the print head. (1) Click on the tab (2) Click Print Head Alignment. (3) Confirm the displayed message and click Align Print Head. The print head alignment pattern will be printed and the printer automatically adjusts the print head position. Do not perform any other operations until the printer completes printing the printhead alignment template. It takes about six minutes. **NOTE** If adjustment of the position of the print head failed, the alarm lamp flashes. Refer to "Undici lampi:" of [Lampo di Alarm lamp blink orange]. To print and control the position adjustment values of the current head, click the Print Alignment Value. 1. Make sure the power is on. 2. Make sure that two or more sheets of A4 or normal letter size paper are loaded into the Cassette. **IMPORTANT** You cannot use the front tray to automatically align the print head. Make sure you upload the card to the Cassette. 3. Open the front tray gently and pull out the extension of the front tray. 4. Open the Canon IJ Printer Utility. 5. Adjust the position of the print head. (1) Select Test Print in the pop-up menu. (2) Click the alignment of the print head. (3) Confirm the displayed message and click Align Print Head. The print head alignment model will be printed and the printer automatically adjusts the position of the print head. Do not perform any other operations until the printer completes printing of the printer head alignment model. It takes about 6 minutes. **NOTE** If the automatic position adjustment of the print head has failed, the alarm lamp flashes. Refer to "Undici lampi:" of [Lampo di Alarm lamp blink orange]. If the print results are not yet satisfactory after adjusting the position of the print head as described above, [align the print head manually]. To print and control the position adjustment values of the current head, click the Print Alignment Value. Manual alignment of the print head This is what this is about. describes how to manually align the Print Head. If the results of the automatic print head alignment are not satisfactory, follow the procedure below to perform the manual print head alignment to accurately align the print head. **NOTE** Make sure to load the paper into the Cassette. The rear tray or manual feed slot of the front tray cannot be used for manual alignment of the print head. The print head alignment model Printed only in black and blue. 1. Make sure the printer is activated. 2. Load two sheets of A4 or Letter-Size Normal paper into the box. 3. Open the front tray gently and extend the extension of the front tray. 4. Print the model. (1) Open the Property dialog. (2) Click the Maintenance tab, then Custom Settings. (3) Select the manual alignment heads check box, then click Send. (4) Confirm the message displayed and click OK. (5) In the maintenance sheet, click Print Head Alignment. (6) Confirm the message displayed and click Align Print Head. **IMPORTANT** Do not open the upper cover while printing is in progress. Note To confirm the current setting, click Print Alignment Value and print the template. (7) After printing the model, click Yes. The dialog box appears to enter an alignment value of the print head. 5. Watch the first print and adjust the position of the print head. (1) Check the printed models and select the model number in the column A which has less obvious vertical streaks. Note If it is difficult to choose the best model, choose the setting that produces less obvious vertical white strips. (A) Less obvious vertical white strips (B) more obvious vertical white strips (2) Repeat the procedure until you end up entering the model number for the K column, then click OK. (3) Confirm the message displayed and click OK. The second model is printed. **IMPORTANT** Do not open the upper cover while printing is in progress. 6. Watch the second print and adjust the position of the print head. (1) Check the printed models and select the model number in the L column which has less obvious vertical streaks. Note If it's difficult to choose the best model, choose the setting that produces the less obvious vertical white strips. (C) Less obvious vertical white strips (D) More obvious vertical white strips (2) Repeat the procedure until you finish inserting the model number for column T, then click OK. Select Pattern number from column R to column T with less obvious horizontal streaks. Note If it is difficult to choose the best reason, choose the setting that produces less obvious horizontal streaks. (E) Horizontal white streaks less obvious (F) more obvious horizontal white streaks (3) Confirm the message displayed and click OK. 1. Make sure the printer is turned on. 2. Upload two A4 paper sheets or letter format in the box. 3. Gently open the front tray and extend the front tray extension. 4. Print the scheme. (1) Open the Canon IJ Printer Utility dialog. (2) Select custom settings in the pop-up menu. (3) Select the Align Teste manually check box, then click Send. (4) Confirm the message displayed and click OK. (5) Select Print Test in the pop-up menu. (6) Click Alignment of the print head. (7) Confirm the message displayed and click Align printing head. The dialog box appears to enter a print head alignment value. **IMPORTANT** Do not open the upper cover while printing is in progress. Note To confirm the current setting, click Print Alignment value and print the reason. 5. Look at the first print and set the position of the print head. (1) Check the printed reasons and select the pattern number in the column A has the less obvious vertical streaks. Note If it is difficult to choose the best reason, choose the setting that produces less obvious vertical white streaks. (A) Less obvious vertical streaks (B) Most obvious vertical white streaks (2) Repeat the procedure until you have finished entering the model number for the K column, then click Send. (3) Confirm the message displayed and click OK. The model is printed. **IMPORTANT** Do not open the top cover while printing is in progress. 6. Look at the second print and adjust the position of the print head. (1) Check the printed motifs and select the motif number in column L with the less obvious vertical striations. **NOTE** If it is to choose the best reason, choose the setting that produces the less obvious vertical white streaks. (C) Minor vertical white streaks (D) Less obvious vertical white streaks (2) Repeat the procedure until you are finished entering the model number for column T, then click Send. Select the reason number from column R to column T with less obvious horizontal streaks. **NOTE** If it is difficult to choose the best reason, choose the setting that produces the less obvious horizontal white streaks. (E) Less horizontal white streaks (F) Less horizontal white streaks more evident
