They include bug fixes, new features, security updates and more. In short, you need to make sure that the console always installs the latest system updates. Usually, this happens automatically, but sometimes cockroaches can prevent it from happening. If your PS4 doesn't update, here's how to fix the problem. How to make sure PS4 updates manually install the update If your PS4 does not automatically install an update, you may force the update to install manually. Ideally, it will also break the non-functional automatic upgrade cycle, and future system updates will automatically install as expected. You can try installing an update manually from the Settings menu. Dave Johnson/BusinessFor details on how to install a manually update, see the second part of the article, "How to update the PS4 console in 2 different ways, to access its latest functionality and security improvements." Deleting notifications First some users reported that the simple cancellation of upload and download notifications can allow a glitching update to succeed. 1. Select Select Press the Options button on the controller.3. In the menu, select "Delete". Delete all notifications can sometimes allow an update to proceed. Dave Johnson / Business Insider 4. Choose "Select All". 5. Select "Delete". 6. After deleting all notifications, try to manually install the update again. Installing the update in temporary mode These steps do not work, you can restart the PS4 in temporary mode, and try the update from there. Safe mode, as on a PC, start your PS4 in a configuration that loads only the most fundamental features, which can often bypass the corrupt software that prevents functionality as system updates from work. 1. Turn off the PS4 completely. 2. When it is completely turned off, press and hold the power button on the front of the console until it cries twice. 3. Release after the second acoustic signal, which should occur about seven seconds after the first acoustic signal. 4. Connect the controller using the USB cable and press the PS button. 5. In the temporary mode menu, choose the three option, "Update System Software". If other troubleshooting steps do not work, restart your PS4 in temporary mode and try the update from there. Dave Johnson / Business Insider If your PS4 refuses to install the update even in temporary mode, you should contact Sony support for additional assistance.
