## SAVOIR TIRER PROFIT DE L'ÉCHEC

- Utilisez une attitude négative pour réexaminer vos objectifs personnels et professionnels.
- Pensez comment cet incident a fait de vous une personne plus forte mieux outillée.
- Laissez L'attitude vous inviter au changement.

The Magento 2 Code Migration Tool enables you to port some of your customizations from Magento 1 to Magento 2. See technical bulletin [Issues upgrading to 2.0.1](#) (Jan. To quickly protect your store from this vulnerability only, install this patch. To learn more about it, see the [README](#). Composer Recommended for most situations Git For Magento Open Source developers Archive Download Magento as zip/tar file Library management Reuse third-party libraries without bundling them with source code. The store will not work correctly in the case when cookies are disabled. A practical guide to the concepts and best practices of theme design for Magento 2.x stores. Which installation method is right for you? Format Select your format Open Source Support Patch MAGETWO-92926 File Size: 0.00 MB Format Select your format Community Edition Support Patch MAGETWO-67805 File Size: 0.00 MB Format Select your format Community Edition Support Patch MDVA-532.zip Community Edition Support Patch MDVA-532.gz Community Edition Support Patch MDVA-532.bz2 File Size: 0.00 MB Format Select your format Community Edition Support Patch MDVA-449.tar.gz File Size: 0.00 MB Patch MDVA-84 for Magento Community Edition - MDVA-84.zip, -tar.gz, and -tar.bz2. Apply this patch if you are running Magento CE 2.0.1 and your Magento server runs 7.0.1 or PHP 7.0.2. It adds support for PHP 7.0.2 to the updater application. See [Remove failed login attempts from the database for information on how to download and install this patch](#). This is a relatively simple installation method, but it lacks many of the advantages of using Composer. The `addAttributeToFilter` method (in `file app/code/Magento/Catalog/Model/ResourceModel/Product/Collection.php`) was refactored without a return statement, which broke the method-chaining that is used extensively in customizations of this feature. An attacker can use these vulnerabilities to inject JavaScript into the Magento Admin, and subsequently launch malicious code in a store user's browser. Format Select your format Admin Dashboard Image-Charts Open Source patch File Size: 0.00 MB This patch provides protection against the SQL injection vulnerability described under [PRODSECBUG-2198](#) here. Format Select your format Catalog Pagination issue on Elasticsearch 6.x for 2.3.3 (GitHub).patch Catalog Pagination issue on Elasticsearch 6.x for 2.3.3 (Composer).patch File Size: 0.00 MB This patch addresses backward compatibility issues that extension developers may have experienced after the introduction of `Magento\Framework\Mail\EmailMessageInterface`, which was released in Magento 2.3.3. In the scope of this patch, the new `EmailMessageInterface` inherits from the old `MessageInterface`, and core modules are changed back to rely on `MessageInterface`. \* Open source contribution Contribute to Magento open source code repositories. Users who attempt to navigate past the first page of search results are unsuccessful, and Magento displays an error message. See [GitHub-15205](#) and [GitHub-15245](#) for more detailed discussions of the problems some customers encountered. See [Brainree Virtual Terminal](#) page is corrupted Knowledge Base article. \*\* If you clone the Magento 2 GitHub repository, you cannot use the Magento software in a production environment. 28, 2016) for more information. Repackaging Repackage Magento Open Source with other components. Users of Magento 2.x deployments will not be able to view static charts in Magento 2.x instances unless they download and apply this patch. Get instructions on installing and configuring the Magento Testing Framework (MTF). Get It Get It Get It Note: Prior to installation we recommend that you review [Magento 2.x System Requirements](#). Format Select your format Resend account confirmation email link issue patch for Magento 2.3.5 (Composer) Resend account confirmation email link issue patch for Magento 2.3.5 (GitHub) File Size: 0.00 MB -Added March 24, 2020 This patch addresses a lingering issue created by the fix for [CVE-2019-8118](#) ([PRODSECBUG-2452](#)) included in [Magento 2.3.3](#) and [2.2.10](#). Format Select your format Magento Open Source Support Patch MAGETWO-95591 for Composer based installation [Magento Open Source Support Patch MAGETWO-95591](#) for GitHub based installation File Size: 0.00 MB This patch provides performance optimization for retrieving product attributes in [Magento 2.2.5](#) Format Select your format Magento Open Source Support Patch MAGETWO-93083 for GitHub based installation [Magento Open Source Support Patch MAGETWO-93083](#) for Composer based installation File Size: 0.00 MB This patch provides a fix for problems that merchants experienced when trying to change a storefront's applied theme in [Magento 2.2.4](#) or [2.2.5](#). See [GitHub-14968](#) for more information. For details on how to install Magento, once downloaded, consult this documentation - Install the Magento archive on your server. See [Applying patches for specific instructions on downloading and applying Magento patches](#). Composer enables you to manage Magento components and their dependencies, providing you with the following advantages over a ZIP install: • Enables you to reuse third-party libraries without bundling them with source code • Component-based architecture with robust dependency management • Semantic versioning • Supports the PHP Framework Interoperability standard A Git clone of the Magento repository is intended for anyone who contributes to the Magento Open Source codebase. PHP standards compliance Adhere to PHP-Framework Interoperability Group (FIG) standards. Format Select your format MC-35984 for 2.4.0 Commerce (Composer) patch MC-35984 for 2.4.0 Commerce (Git) patch File Size: 0.00 MB This hotfix resolves an issue with [Magento Commerce 2.4.0](#) and [Magento Open Source 2.4.0](#) where merchants could not add ordered products to a package from the Admin Create Package page and save the package. Affected Magento versions: [Magento Commerce and Open Source v2.3.4](#) (on prem and cloud). [Magento multi-store installations](#) were not using the store view-specific values from the store configuration settings if these settings differed from the global default configuration settings. You can download in either zip or tar format. However, if you need an all-in-one cloud solution that is optimized, easy to deploy, provides enhanced security, and is packed with additional integrated capabilities to accelerate sales; consider [Magento Commerce](#). Downloading an archive file allows you to run Magento software on a local server. [Magento Open Source](#) delivers features to build and grow a unique online store from the ground up. Additionally, merchants could not edit existing customer attributes from the customer's account on the storefront. (This known issue was first identified in [Magento 2.3.5](#).) Affected Magento versions: [Magento Commerce and Open Source v2.3.5 /v2.3.5-p1 /v2.3.5-p2](#) (on prem and cloud). Format Select your format [EmailMessageInterface backward compatibility issue patch for Magento 2.3.3](#) (GitHub) File Size: 0.00 MB This patch addresses changes that were introduced in [Magento 2.3.3](#) that resulted in problems with extensions and customizations of the product collection feature that rely on method chaining contracts. Format Select your format [BUNDLE-2670](#) Brainree Virtual Terminal composer patch File Size: 0.00 MB This hotfix resolves an issue with [Magento Commerce 2.4.0](#) and [Magento Open Source 2.4.0](#) where merchants could not access the [Brainree Settlement Report](#) page (Admin > Reports). The issue affects the following Magento versions (on prem and cloud): [Magento Open Source v2.3.1](#), [2.3.0](#), [2.2.8](#), and earlier [2.2.x](#) releases [Magento Commerce v2.3.1](#), [2.3.0](#), [2.2.8](#), and earlier [2.2.x](#) releases [Magento Commerce Cloud v2.3.1](#), [2.3.0](#), [2.2.8](#), and earlier [2.2.x](#) releases [Format Select your format PRODSECBUG-2233](#) for 2.3.x (Composer Version, CE) [PRODSECBUG-2233](#) for 2.2.x (Composer Version, CE) [PRODSECBUG-2233](#) for 2.3.x (GitHub Version, CE) [PRODSECBUG-2233](#) for 2.2.x (GitHub Version, CE) File Size: 0.00 MB This patch resolves an issue with the `Async` and `Bulk APIs`, which in certain versions of Magento do not provide the information needed to update or create data for specific stores. Format Select your format [MC-35514](#) for 2.4.0 Open Source (Composer) patch [MC-35514](#) for 2.4.0 Open Source (Git) patch File Size: 0.00 MB -Added May 20, 2020 This patch resolves an issue in [Magento 2.3.5](#) and [2.3.5-p1](#) where the storefront checkout workflow did not display any payment method that has been enabled for specific countries with the exception of the [Klarna](#) and [Amazon Pay](#) payment methods. Affected Magento versions: [Magento Commerce and Open Source v2.3.5 /v2.3.5-p1](#) (on prem and cloud). Format Select your format [CLEANUP\\_PATCH\\_COMPOSER\\_2.3.2](#).patch File Size: 0.00 MB -Added February 12, 2020 This patch resolves the issue which affects orders placed with [PayPal Express Checkout](#) where the order's shipping address specifies a country region that has been manually entered into the text field rather than selected from the drop-down menu on the Shipping page. Reference articles to assist developers and integrators with installations, upgrades, patches, and customizations. Merchants who are running [Magento 2.2.4](#) should upgrade to [2.2.5](#) and then apply this patch. Merchants should apply this patch as soon as possible, especially if their deployments include extensions or customizations that use the mail interface. To learn more about it, see the [Data Migration Guide](#). Web Setup Wizard Use the to upgrade the Magento software and third-party extensions. Affected Magento versions: [Magento Commerce and Open Source v2.4.1 /v2.3.6](#) (on prem and Cloud). Production ready Use the [Magento software](#) in a production environment. Affected Magento versions are: [Magento Open Source v2.3.2](#), [2.3.1](#). Format Select your format [Scope parameter for Async/Bulk API 2.3.2](#) composer patch [Scope parameter for Async/Bulk API 2.3.2](#) git patch [Scope parameter for Async/Bulk API 2.3.1](#) git patch [Scope parameter for Async/Bulk API 2.3.1](#) composer patch File Size: 0.00 MB An issue has been discovered in [Magento Open Source](#) and [Magento Commerce](#) that can be used to disclose the URL location of a [Magento Admin](#) panel. See [Applying patches for specific instructions on downloading and applying Magento patches](#). Without this patch, the `Async/Bulk` REST APIs will support the default store view scope only. Because of the differences between the two platforms, some additional coding is required. If you're using [PHP 7.1](#), download [Magento 2.2](#) with [Composer](#) instead to avoid compatibility issues during installation. Download [Version Description](#) Here you can download the latest patches and updates for all versions of [Magento 2.x](#). For details on patching Magento, read the [Applying patches](#) page on [DevDocs](#) -Added October 26, 2020 This hotfix resolves an issue with [Magento Commerce and Open Source 2.4.1](#) and [2.3.6](#) where the "Create an Account" button on the [Create New Account](#) page remains disabled if a shopper has entered invalid data. Format Select your format [Amazon Pay select payment method patch for Magento 2.3.5-p1](#) (Composer) File Size: 0.00 MB -Added April 29, 2020 This patch resolves an inability to re-send an account confirmation email link from storefront account login page. Leverage structural components, theme hierarchy, and fallback methods to create custom themes. Affected Magento versions: [Magento Commerce and Open Source v2.3.3](#) (on Prem and Cloud). For complete details, install instructions, and recommendations, see: [Format Select your format PRODSECBUG-2432-2.1-CE](#).composer.patch [PRODSECBUG-2432-2.2-CE](#).composer.patch [PRODSECBUG-2432-2.3-CE](#).composer.patch File Size: 0.00 MB This patch provides a replacement for the deprecated [Google Image Charts](#) service that [Magento](#) uses for all 2.x instances and replaces it with the [Image Charts](#) free service. Format Select your format [BUNDLE-2683](#) Brainree Settlement Report composer patch File Size: 0.00 MB This hotfix resolves an issue with [Magento Commerce 2.4.0](#) where merchants could not interact with any page elements on the [Returns](#) page after creating a shipping label for a [Return Merchandise Authorization](#) (RMA). However, to apply protection against this vulnerability and others, you must apply the [2.3.1](#), [2.2.8](#), or [2.1.17](#) patch code. [Dependency management](#) Component-based architecture to reduce extension conflicts and compatibility issues. Format Select your format [Magento Open Source Support Patch MAGETWO-93036](#) File Size: 0.00 MB Resolution of issues that customers were experiencing when upgrading to [Magento 2.2.4](#) in deployments that span multiple websites. The [Magento 2](#) Data Migration Tool helps you efficiently port all of your key product, customer, and order data, store configurations, promotions and more to from [Magento 1](#) to [Magento 2](#). If that is not you, please choose another download method. We strongly recommend that all users of the affected versions of [Magento](#) download and apply the appropriate patch as soon as possible. Format Select your format [MC-38509](#) for 2.4.1 and [2.3.6](#) (Git) patch File Size: 0.00 MB This hotfix resolves an issue with [Magento Commerce 2.4.0](#) and [Magento Open Source 2.4.0](#) where [Magento](#) throws an error when opening "Sales > Brainree Virtual Terminal". While there is currently no reason to believe this issue would lead to a compromise directly, knowing the URL location could make it easier to automate attacks. Format Select your format [Fixed method chaining contract for Product Collection composer patch Fixed method chaining contract for Product Collection github patch](#) File Size: 0.00 MB An unauthenticated cross-site scripting vulnerability combined with an authenticated `Phar` deserialization vulnerability has left older versions of [Magento Commerce](#) and [Magento Open Source](#) open to serious exploit. While the fix for that bug stopped the logging of failed login attempts, information collected prior to updating to these current versions may still exist, and previous, unpatched versions of [Magento](#) may still have this issue. After this patch is installed, users will be able to page through all search results. This patch clears the login attempts that were previously collected. This prevents shoppers from re-attempting to create an account after making an error. You cannot have a live store that accepts orders and so on. Format Select your format [Specific country payment method patch for Magento 2.3.5-p1](#) (Composer) File Size: 0.00 MB -Added May 04, 2020 This patch resolves the issue with inability to change a payment method on checkout "Review & Payments" step from the payments widget, while checking out with [Amazon Pay](#). You should be: • Highly technical, • Understand [Composer](#) and [Git](#) commands, and • Be able to upgrade the [Magento](#) system software and extensions using those commands. Affected Magento versions: [Magento Commerce and Open Source v2.3.3](#). See the [Magento](#) forum [DevBlog](#) post for more information. - [Marissa Axell](#), co-founder of [17th Street Athletic Club](#) 37% lift on online bookings 250% increase in email signups Results not typical. Merchants who are running 2.2.5 should apply this patch or upgrade to 2.2.6 when it becomes available. If you may need any of the [Composer](#) features noted above, we recommend you use that method instead. To help prevent against potential attacks, [Magento](#) has released patches for this issue. You can also choose to include sample date, or not, with your download. This most up-to-date documentation for the current [Magento 2.x](#) release combines easy-to-follow tutorials with comprehensive reference material. We strongly suggest that you install these full patches as soon as you can [Format Select your format PRODSECBUG-2198-2.1-CE](#).patch [PRODSECBUG-2198-2.2-CE](#).patch [PRODSECBUG-2198-2.3-CE](#).patch [PRODSECBUG-2198-2.1-CE](#).composer.patch [PRODSECBUG-2198-2.2-CE](#).composer.patch [PRODSECBUG-2198-2.3-CE](#).composer.patch [PRODSECBUG-2198-2.1-CE-v2](#).patch [PRODSECBUG-2198-2.1-CE-v2](#).composer.patch File Size: 0.00 MB Format Select your format [GitHub based installations - 2.2.x+](#) - [Authorize.net Signature Key patch - CE](#) Composer based installations - 2.2.x+ - [Authorize.net Signature Key patch - CE](#) File Size: 0.00 MB This hot fix resolves issues that merchants experienced with custom attributes after upgrading to [Magento 2.2.6](#). Merchants were not able to save a newly created multiselect or dropdown customer attribute. See [Switch from deprecated Google Image Charts to Image-Charts for Magento](#) for more information. This patch refactors the method to add the missing return statement and ensure that method chaining works. \*\* [Magento 2.2](#) archives are compatible with [PHP 7.0](#) only. Instead, [Magento](#) used the default configuration for all store views. [Format Select your format PayPal Express Checkout](#) issue with region patch for [Magento 2.3.4](#) (Composer) [PayPal Express Checkout](#) issue with region patch for [Magento 2.3.4](#) (GitHub) File Size: 0.00 MB This patch resolves issues that users of [Magento 2.3.3](#) experience in deployments where [Elasticsearch 6.x](#) is used as the catalog search engine.
