## How to bypass activation lock on ipad mini

If you buy an iPhone second-hand and it has iCloud Activation Lock activated, and the seller is unavailable, you can still get going with the iPhone. Here's how to remove iCloud Activation Lock without password. Sometimes, on acquiring a used or refurbished iPhone, you could run into an issue where iCloud Activation Lock is enabled on a device. Intended as a security feature, Activation Lock is part of Find My, helping device owners to lock down their iPhone or iPad and to prevent others from being able to gain access, or even reuse the device once found. However, there can be situations where the iPhone is in the legitimate owner's hands but is still blocked and requires an iCloud Activation Lock removal. For example, the owner may have enabled it and forgotten their Apple ID or passcode completely, and all attempts to regain their account credentials have failed. A more likely scenario is that the iPhone or iPad was sold on, and the lock was activated, but the original owner cannot be contacted to remove iCloud activation lock. It is usually recommended for device sellers to completely wipe the hardware and disassociate their accounts, but sometimes this doesn't happen. PassFab Activation Unlocker is a tool used to perform an iPhone Activation Lock bypass. When used, it can allow the user to set up their iPhone by working around the lock. It can also perform an iPad Activation Lock removal, as the same system can protect iPads using iPadOS. The activation lock iPhone bypass is not the only way that the software could be used, as it can also be employed for various other activation error problems. For example, activating an iPhone with a very old iOS version or if the device is locked to a different carrier. In such situations, there are other things you can potentially do, such as contacting the carrier, checking the SIM card's seated correctly, or even simply restarting the device. But, if these all fail to fix the issue, you're going to need a tool like this. As PassFab Activation Unlocker is available for both Windows and Mac, there are detailed processes available for both operating systems. Instructions to bypass iCloud activation lock are available for using the tool are also available via PassFab's website. A video showing how to remove iCloud lock from devices is also available on YouTube. First, download and install PassFab Activation Unlocker. Once installed, launch it and select Remove iCloud Activation Lock, then Start. Accept the end-user license agreement by ticking the checkbox confirming you have read the agreement, and then click Next. Connect your iPhone up to the Mac. The PassFab Activation Unlocker will then detect the connected device and download a jailbreaking tool for the procedure. A jailbreak tool is downloaded and used for the bypass. Once downloaded, you are advised to follow the onscreen instructions, to keep the iPhone or iPad connected to the Mac using a USB cable throughout, and to make sure it is fully charged before starting. To commence the action, click Start Jailbreak. The bypass process is easier on macOS than on Windows The process to perform the jailbreak is more involved on Windows, as it requires creating a bootable USB flash drive that you then boot from and perform the jailbreak through. On connecting your iPhone, the PassFab Activation Unlocker will detect it and download a jailbreaking tool. It will then ask for a USB flash drive to be inserted, which the tool will wipe and create into a bootable drive. The process on Windows requires you to create a bootable USB drive. Select the USB drive and click Start. Click Yes on the confirmation, and it will wipe the USB drive. Once it has been installed on the USB drive, you will be presented with instructions to reboot and enter the BIOS of the computer. You also have to set the USB Drive as the boot device, and you also get told the sequence of commands to select in the jailbreak tool once the PC has successfully booted from the USB drive. Instructions for processing the jailbreak are provided just before performing it on Windows. After completing the jailbreak, you will have to set the PC to boot to the original system disk and then boot to continue from the main application. Once the jailbreak has been completed, you will be prompted to confirm the connected iPhone or iPad device information. To continue, click Start for the iPhone Activation Lock remove process to begin. A final confirmation will advise the process to remove iCloud account from iPhone activation has been completed. Click Done to finish. After the jailbreak, you can remove the iCloud Activation Lock. At this point, you will be able to start setting up the iPhone or iPad, using an Apple ID to sign into the device. If you have access to the Apple ID that instigated the Activation Lock, you could disable the lock via iCloud. In any browser, head to iCloud.com and sign in with the associated Apple ID and password. Select Find my iPhone. It will be in the bottom right of the screen. Click All Devices in the top of the display, then select the iPhone or iPad in question. Click "Erase iPhone" or "Erase iPad." On the confirmation pop-up, click Erase. You can erase your iPhone from the browser-based Find My tool. If you know your Apple ID, but not your password, there are a few options to rescue your account. If this is the only Apple device in your possession, an easy way to do so is to borrow someone else's Apple device, and then to use the Apple Support app. In the Apple Support app, Select Passwords & Security under Topics. Select Reset Apple ID password, tap Get Started, then select "A different Apple ID." Enter the Apple ID you want to reset the password for, then next. Follow the onscreen steps to change the password. You can also perform a password reset via the Apple ID account page at [appleid.apple.com](https://appleid.apple.com) in a browser. Click "Forgotten your Apple ID or password?" underneath the login screen to get started. Then, enter your Apple ID and click Continue. You can recover your Apple ID password from Apple's website. If you have security questions set up, or phone numbers associated with the account, you may be asked for that information as a security check. You can also be offered the option to receive an email to your primary or rescue email address, in order to process the password reset. If you have two-factor authentication, you will be asked for a recovery key for your Apple ID, which you must enter. If you have permanently lost the recovery key, you cannot reset the password. The PassFab Activation Unlocker is a handy tool to remove iCloud account from iPhone activation in these particular circumstances. If all other avenues to fix the problem have been exhausted, it's a handy tool to unlock iCloud activation lock on your device. AppleInsider always recommends that users keep backups of data stored on their Apple devices, especially in cases where a device has to be wiped such as this. While this isn't as important for acquisitions of refurbished iPhones, it is still a best practice in case such a situation arises. PassFab Activation Unlocker is priced at \$29.95 for a one-month license on Windows, \$39.95 for one year, and \$49.95 for a lifetime license, affecting one PC and 5 devices. On macOS, a one-month license is \$39.95, a one-year license is \$59.95, and the lifetime license is \$69.95. A 30% discount is available to buyers of PassFab Activation Unlocker, using coupon code REVIE for the one-month and one-year Windows licenses. Is it possible to unlock locked iPhone or iPad? Learn how to unlock Apple device if it is locked and does not allow to pass activation screen. There is an opinion on the Internet that you cannot unlock Apple iPhone or iPad that asks for a passcode. But this opinion is wrong. Every day many people indeed face the problem of iCloud Activation Lock on Apple devices. Not always it happens because the iPhone or iPad is lost. Unfortunately, we cannot deny that there are many scam services on the Internet. So please be careful in choosing a reliable service to unlock your iPhone, iPad, or Mac! Before placing your order for bypassing the iCloud Activation Lock, make sure to read reviews about the service, learn about its Money Back Policy and Terms of Use. Rely only on trusted services! Let's see how to bypass the iCloud Lock on iPhone and iPad. Is It Possible to Unlock iPhone Activation Lock? Absolutely! Even if you forgot the iCloud passcode or answers to security questions, you could try to unlock iPhone Activation Lock. You would need to have a receipt. With it, you should open a case with Apple and provide your proof of purchase from the company. Unfortunately, not many of us keep our receipts after making a purchase. In many situations, we prefer buying a device from individual sellers, via social networks, online auctions, or avoiding authorized dealers. In this case, we become a hostage to the situation, and it becomes impossible to unlock iPhone Activation Lock ourselves! You can still regain access to your Apple ID and disable the Find My app following our instructions or official information provided by the Apple website. Suppose you forgot your iCloud passcode, but you still have access to your email account or remember the answers to security questions. In that case, you can use the free official Apple password recovery option on It turns out that iCloud unlock is not possible, is it? Well, no. Everything is possible. You must understand how device activation works! When your iPhone or iPad connects to the Internet for the first time after updating or restoring, the device sends a request to the Apple Activation Server. If Find My is enabled, the device asks you to enter your Apple ID and passcode to activate it. If Find My is off, you will start your device without problems. Our website contains a catalog of software capable of remotely bypassing iCloud Activation Lock on iPhone, iPad, and Mac computers. We want to warn you that the software only bypasses the iCloud Activation Lock on a locked device. It does not unlock iPhone Activation Lock, but it is the only reliable and working method of removing the iCloud Lock on iPhone, iPad, or Mac! iCloud Bypass and iCloud Unlock: What Is the Difference Between Them The iCloud unlock is a permanent unlock that unlinks a device from the Apple ID. The unlocked device still sends the activation request to Apple Server, but it activates with no issues. However, iCloud unlock is not always possible. Users who do not remember their Apple ID passcode or have no receipt encounter problems when they try to recover access to their device. The iCloud Bypass is a bypass of the Activation Lock on iPhone or iPad. In simple words, the bypass only skips the Activation step and makes the device understand that it has been activated. Please note that activation of the device occurs only once. It means that after bypassing the Activation Lock, your device will operate normally without any problems unless you reset it to factory settings. Once you reset the iPhone or iPad, your device will try to resend the activation request to Apple Servers. Accordingly, it will be locked again! Luckily, users who bypass iCloud Activation Lock using our software have nothing to worry about. When you order the iCloud Lock Bypass license for your device, you can reuse the software and get around the Activation Lock without any difficulties! Is It Possible to Bypass iCloud Activation Lock on Any Device? As already mentioned, it is possible to bypass iCloud Activation Lock on Apple gadgets. However, this service does not work on all devices! There are exceptions. Our software can bypass Activation Lock thanks to the checkm8 exploit. This BootROM exploit is used to run unsigned code on iOS, iPadOS, tvOS, watchOS, bridgeOS, audioOS, and Haywire devices with processors A5-A11, S1P, S3, S5L8747, and T2. What does it mean? Activation Lock bypass is only possible on devices with the listed processors. The supported models are iPhone 5S, SE, 6, 6S, 7, 7 Plus, 8, 8 Plus, X, iMac, MacBook Pro, MacBook Air, iMac (Pro), Mac Pro, and Mac Pro released in 2018. We also want to note that a jailbreak tool, Checkra1n, uses the same exploit, which works by using the benefit of a heap overflow in the USB DFU stack. Sounds complicated, doesn't it? But thanks to our Dev Team, the iCloud Activation Lock bypass is now available to every user. The software requires no technical knowledge, and this is its main advantage! How Activation Lock Bypass Works on iPhone, iPad, Mac Our Software Engineering Team has developed several tools to bypass iCloud Lock on iPhone, iPad, and Mac. We did our best to create a convenient and user-friendly solution for users who face the Activation Lock problem. We have succeeded! We always upgrade our software when new iOS and macOS versions are released. We also keep all our customers informed about every update and release of new tools. The software is based on checkm8 exploit, which helps to bypass iCloud Activation Lock on many supported Apple devices. And as of today, it is the only working tool for unlocking Apple devices. All the bypassing magic occurs directly on the device. After using the software on gadgets with checkm8 exploit, the devices skip the Activation step. As a result, you will get a fully working gadget. You will be able to use your Apple ID on it, get rid of all possible restrictions, download and install applications, make and receive calls. To put it simply, you can use your device as usual. Before you can use the software, you should download it and connect your locked device. We made sure that no orders for the iCloud Activation Lock Bypass are placed by mistake. The software will check your iPhone, iPad, or Mac to ensure it is eligible for using this service. After confirming compatibility, the software will prompt you to buy the iCloud Activation Lock Bypass license for your locked device. Every bypassing tool we developed is easy to use. We simplified the process of bypassing Activation Lock on locked gadgets. All you have to do is click a single button! The software requires no technical skills from the user. When you purchase a license for using our software, you can be sure that you can fix the problem if the Activation Lock returns. You can always download our software from our website and successfully reuse it at no additional cost! With the purchase of a license, you will always receive qualified support and future software updates! And our Money-Back Policy guarantees a refund in case of an unsuccessful Activation Lock bypass on the eligible device! how to bypass activation lock on ipad mini without previous owner. how to bypass activation lock on ipad mini 2. how to bypass activation lock on ipad mini 1. how to bypass activation lock on ipad mini 4. how to bypass activation lock on ipad mini for free. how to bypass activation lock on ipad mini 3. how to bypass activation lock on ipad mini without previous owner free
