Those seeking public records must submit a request in writing and will be charged only the actual cost of making copies and mailing costs, if applicable. If the records need to be researched or reviewed, you will be sent a written response and/or the records in no more than 10 business days. The words main and mane are classic examples of English homophones: words that sound the same but have different meanings and spellings. Main is most commonly used as an adjective to denote the chief or primary thing in a group. On the other hand, mane is a noun that refers to the long hair on the neck of a horse, lion, or other animals. The word main is used to refer to the most important or largest part of something. It is frequently used to describe the principal component of a system or the chief factor in a situation. When discussing topics, main can signify the primary subject or focus. Examples of main in a sentence: The main reason for the event's success was the meticulous planning. Please take the main road for a faster route to the city center. Her main focus now is to improve her health. The word mane is used to describe the long, thick hair that grows from the neck of certain mammals, like horses and lions. It is typically mentioned when describing animals, their appearance, or when detailing characteristics specific to certain breeds or species. Examples of mane in a sentence: The horse flicked its mane in the breeze as it galloped across the field. She braided her horse's mane with ribbons for the parade. The lion's thick mane was a sign of his maturity and strength. Main definition: Main (adjective) - refers to the principal or most significant element, factor, or component in a group or series. Main parts of speech: As an adjective: The main attraction of the show drew a large crowd. Main pronunciation: Main is pronounced as /men/, which rhymes with the words "rain" and "plane". Mane definition: Mane (noun) - the long, thick hair growing from the neck of a horse, lion, or other animals. Mane parts of speech: As a noun: A grooming brush is essential for keeping a horse's mane tidy. Mane pronunciation: Mane is pronounced as /men/, identical in sound to the word "main," enabling the two words to be used in playful puns or confusions. While main and mane share pronunciation, their uses are quite distinct. Main functions primarily as an adjective, establishing importance or centrality within a group or system. Mane, in contrast, is a noun that specifically refers to a unique feature of certain animals. Both words play different roles in language, each adding rich descriptive layers to English expression. Make sure your vocabulary is on point and every punctuation mark is in the right place, no matter where you're working. Grammarly works across more than 500,000 websites and apps so you can improve your writing without copying, pasting, or breaking focus. Access to health and social services for immigrants and refugees in Portland Maine Learn more Main is an adjective which means the thing of principal importance, central. Main may be used as a noun to refer to the principal pipe or cable carrying utilities such as water, gas or electricity, to a building. In British English, these pipes are called the mains. Archaically, main means the open ocean. The word main comes into use in the early thirteenth century to mean large, bulky, strong, from the Old English maegen meaning power, strength, force. By the fifteenth century, main also meant chief. A mane is the long, flowing hair that grows along the neck of a horse, lion or other furred animal. Mane may also refer to a persons hair if it is long and thick. Mane comes from the Old English word manu, meaning mane. Maine is one of the fifty states of the United States of America. Maine is part of the New England area, it was probably named by French explorers after the Mayne region in France. An alternative theory for the origin of the name Maine is that explorers used the word to distinguish it as the mainland, as opposed to the offshore islands. Examples: Carly Fiorina Makes It to Main Stage At CNNs Next GOP Debate (Variety) The Main Reason Trump Shouldnt Be President Is Painfully Obvious (The Huffington Post) Im the Electric Gran: Anne has to plug her heart into the mains to stay alive (The Mirror) The horses mane had been plaited overnight on Monday, leading Abbie to believe thivets were setting up a raid. (The Scottish Daily Record) Green with envy: Dancing With The Stars second runner-up Ash Pollard lets down her lioness mane as the shows after party in black gown with lime-coloured clutch (The Daily Mail) This is a great honor for Brian, and we are proud he is joining this elite group of Maine golf professionals, Tracy Willewe, director of Bangor Parks and Recreation, said in a news release. Your support has been invaluable aswe embark on many new & exciting ventures! The fair is truly a celebration of you, so thanks for your participation!! 2025 Fair Schedule Coming Soon! Year End Financial Report Additional information regarding the Year End Financial Report is available upon request. Those seeking public records must submit a request in writing and will be charged only the actual cost of making copies and mailing costs, if applicable. If the records need to be researched or reviewed, you will be sent a written response and/or the records in no more than 10 business days. The words main and mane are classic examples of English homophones: words that sound the same but have different meanings and spellings. Main is most commonly used as an adjective to denote the chief or primary thing in a group. On the other hand, mane is a noun that refers to the long hair on the neck of a horse, lion, or other animals. The word main is used to refer to the most important or largest part of something. It is frequently used to describe the principal component of a system or the chief factor in a situation. When discussing topics, main can signify the primary subject or focus. Examples of main in a
