A new version of Windows 11 has been released by Microsoft, and it comes with a slew of new personalization possibilities. The easiest method to personalize your Windows 11 PC is to change the wallpaper. Windows 11 users have access to a wide variety of wallpaper selections. Live wallpapers or Animated wallpapers, on the other hand, are included by default. This is possible with a number of third-party software available. The best program for altering and acquiring high-quality wallpapers for Windows 11 will be discussed in this post. Download Live or Animated Wallpaper for Windows 11 (4K Resolution) 1. RainWallpaper This is another handy program for setting up 4K resolution live wallpapers on your Windows 11 computer. Websites may be made into wallpapers or interactive wallpapers with mouse interactions. The software's creators say that it uses very little CPU and RAM, and so has no impact on your computer's performance. It also comes with a sophisticated wallpaper editor that can be used to make dynamic wallpapers from static pictures. RainWallpaper also works with multiple screens and monitors with varied aspect ratios. It is a user-friendly program, so new users will have no trouble navigating it. Click Here to Download RainWallpaper 2. Wallpaper Engine This is one of the greatest programs for setting up 4K resolution live wallpaper on your Windows 11 computer. One of the software's unique features is that it allows users to set any website as their live wallpaper. 16:9, 219:9, 16:10, and 4:3 are among the ratios supported by Wallpaper Engine. As a result, even if you have an ultra-wide display or a multi-screen configuration, you may use live wallpapers on your Windows 11 PC. It also comes with a Wallpaper Engine Editor for creating your own unique live wallpapers. It can play videos in mp4, WebM, Avi, m4v, MOV, and WMV formats. Click Here to Download Wallpaper Engine 3. Lively Wallpapers This is an open-source project for 4K resolution Windows 11 live wallpaper software. It includes features like interactive websites as backdrops, audio visualizers as backgrounds, and much more. Other helpful features of Lively Wallpaper include multi-monitor compatibility, HiDPI resolution, ultra-wide ratio support, drag and drop videos for live preview, and so on. Click Here to Download Lively software 4. DeskScapes This software, like the software described above, allows users to select from an existing selection of wallpapers or build their own utilizing more than 50 special effects. It also allows for the use of multiple screens. Here, you may utilize WMV video files to build your own live wallpaper or alter an existing wallpaper by changing the hues of specific colours or the entire wallpaper. You may utilize the preview function when generating a live wallpaper to see how your desktop will look once you install the wallpaper. Click Here to Download DeskScapes 5. Chameleon Wallpaper app This is a one-of-a-kind live wallpaper/ animated wallpaper program for Windows 11 computers. As the name implies, it may change the colour of your live wallpaper to match the backdrop colour as soon as you move the mouse. It has some of the most helpful features, such as smooth animation performance, zero shadow mode, the option to display a camera preview, and so on. It is, however, highly efficient and hence requires the least amount of CPU and RAM. Click Here to Download the Chameleon app These are the finest 4K resolution live wallpapers for Windows 11 that we could discover. You may look them over and see which one best matches your needs. Some of these programs are free, while others aren't. Each of these live wallpapers, however, has its own set of characteristics. Having that said, what do you think about the wallpaper applications mentioned above or there are any other best wallpaper applications you know? Do let us know by dropping a comment down below. Add 3D Animated Wallpapers to Windows 10When we think of a desktop wallpaper, we usually think of a static 2D image. However, Windows 10 allows a wild variety of wallpaper types, including animated images and 3D effects. In fact, you can add a variety of wallpapers to Windows 10 with animations and 3D effects to give your desktop a little more visual appeal. There are all kinds of programs and websites with Windows 10 wallpapers. For this article, we'll focus on just one website, Push, but there are tons more out there if these selections aren't to your taste. Push has lots of freely-available wallpaper software programs, including those with 3D effects and animations. Push also has full registered versions available. Add Some Space Wormholes to the Desktop with Space Journey 3DFirst, check out Space Journey 3D to add awesome 3D space animations to the desktop. Press the Download button beside Space Journey 3D to save the setup. Then click the setup wizard to add the program to Windows and launch the software. When you have it up and running, it adds mystifying 3D wormholes to the desktop as shown directly below. To select alternative wallpapers, right-click the Live Wallpaper icon in the system tray and select Settings to open the window directly below. There you can choose some alternative effects by clicking the thumbnails. Directly below those, you can select a time period for each of the wallpapers to remain on the desktop for before switching to another space background. There are a few customization options you can select from this window. For example, drag the Flying Speed bar further right to speed up the 3D space effect. Or click the Color Scheme drop-down menu to choose alternative colors for the wallpapers. Press the OK button to apply the settings. Add Water Effects to the Desktop with Watery Desktop 3DWatery Desktop 3D adds water effects to your desktop wallpaper. The background image effectively remains the same, but it includes 3D water effects. Press the Download button beside Watery Desktop 3D on this page to save the setup. Run through the setup to add the program and its water effects to your desktop as shown below. Click the software's system tray icon to open the window below. You can select a few alternative water effects from there. Click the Shuffle check box there to automatically switch between the effects at specified intervals. On the far right there's a Brightness bar you can drag. If you drag that bar to the far left, a black background replaces the wallpaper as below. This is also an option included in Snowy Desktop 3D. The cursor can also have some impact on the water effects. Select the Wave from cursor moving check box option. Then moving the cursor will generate some wave water effects on the desktop. Add Animated Snow Flakes to Windows 10 with Snowy Desktop 3DIf you like having your desktop turn into a winter wonderland, you're in luck with Snowy Desktop 3D! You can add this software to Windows 10 much the same as the others by pressing the Download button beside it on this page and opening the setup. When the programs running, it adds 3D snow flake effects to the wallpaper as shown in the shot directly below. Click the Snowy Desktop 3D system tray icon to open its settings window directly below. You can choose a variety of winter themed wallpapers from that window. Click the Shuffle check box to configure the wallpapers as a slideshow that displays each background for a specific time. There are two Snow Settings bars that you can drag to configure the snow effects with. The Density bar effectively adjusts how much snow falls. Drag it to the far right to maximize the amount of snow fall. Drag the Brightness bar to customize the snow visibility. If you drag that bar further left, the snow will have limited visibility on the desktop. Note that you can also select the 3D snow, and other effects covered above, as a screen saver. Right-click the desktop, select Personalize, Themes, Theme Settings and Screen Saver to open the window below. Then you can choose Snowy Desktop 3D Screensaver from the drop-down menu. Click Apply and OK to save the settings and close window. Add Animated Wallpapers to the Desktop With PUSH Video WallpaperWant an even wider variety of animated wallpaper? You can get it with PUSH Video Wallpaper. Press the Download button beside PUSH Video Wallpaper on the Push site to save the software's Zip. Then run the software's setup to install it, and open the window shown in the snapshot directly below. Next, you'll need to save some animated PUSH wallpaper, which you can do from this site. Click Download under a wallpaper thumbnail there to save its Zip folder. Then you'll need to extract the compressed folder by pressing the Extract all button in File Explorer and choosing a path for the extracted folder. Open the PUSH Video Wallpaper window again, and press the Add videos from folder to playlist button there. Then select the extracted PUSH wallpaper folder to add its animated wallpaper to the Video Files list in the software's window. Select the animated wallpaper from there to add it to the desktop as below. There are a few customization settings for the animated wallpapers. For example, there's a Change Mode option there with which you can choose how to switch between the alternative wallpapers on the desktop. For instance, by selecting On Delay Time you can choose a wallpaper to change every 10, 15, 20 minutes, etc. Some of the animated desktop wallpapers might also have audio. Thus, the settings window includes a Volume bar if that is the case. You can adjust the audio configuration for the wallpapers with that bar. Press the OK button to apply any selected settings. Those are just some of the software packages you can use to add animated wallpaper and 3D effects to the Windows 10 desktop. The wallpapers and screen savers add a lot of extra gloss to Windows, and will certainly liven up your desktop. You can also add animated wallpapers to Windows with DeskScape, but that isn't a freeware software package. For further Windows 10 desktop customization tips, check out this TechJunkie guide.
