

Click to verify

If you use Gmail, you already have a Google Account. With a Google Account, you have access to Google products at no charge like Drive, Docs, Calendar, and more. To sign in to your Google Account (or any Google product): Go to the sign in page of the product (for Google Accounts it is myaccount.google.com). Enter your Gmail username (everything that appears before '@gmail.com'). Enter your password. Add Gmail to an existing Google Account If you add Gmail to your Google Account, your account's primary username permanently changes to yourusername@gmail.com. After you add Gmail, the original email address associated with your account becomes your alternate email address. If you verify your original email address before you add Gmail, you can sign in with this email address. To add Gmail to your Google Account: Go to mail.google.com. Fill out the form. Click Submit. To verify your account, follow the instructions. Tip: If you use Sign in with Google or Chrome Remote Desktop and you change your primary email address, you may experience issues. Learn about issues with primary email address change. Common issues I don't think I have a Gmail account New Google Accounts come with Gmail, so you should already have a Gmail address if you've created your account recently. If you never created a Gmail account, you can sign up at no charge. To create a Gmail account: Go to [Gmail.com](https://gmail.com). Select More options Create an account. Follow the onscreen instructions. I think I deleted my Gmail account If you already have a Google Account and deleted your Gmail account, you can add Gmail to your current Google Account. To add Gmail: Go to mail.google.com. Sign in to your Google Account. Follow the onscreen information to add Gmail to your account. When you add Gmail, your Gmail address will become the primary username on your account. It will be what others see when you share information, such as documents or photos, from your Google Account. Your original email address will become the recovery address on your account. If you have more questions, visit the Gmail Help Center. Post to the help community Get answers from community members Get Gmail: Web (mail.google.com), Android, or iOS Gmail quick start guides Quickly learn how to migrate your old email messages, set up your inbox, organize your email, and more. To get started, turn on offline mail in Chrome. Turn on offline mail Important: You can only use Gmail offline in a Chrome browser window that isn't in Incognito mode. Download Google Chrome. On your computer, go to Gmail offline settings. Next to "Enable offline mail," check the box. Choose your settings, such as how many days of messages you want to sync. Click Save changes. Tip: To make it easy to find your offline inbox in Chrome, bookmark Gmail. On your computer, open Chrome. In Chrome, go to Gmail. On the right, in the address bar, select Bookmark. Learn what to expect when you use Gmail offline Check storage settings: When offline, Gmail only uses the space available to your browser. It's a fraction of your computer's total storage. The storage shown in Gmail offline settings is smaller than your computer's actual available storage. Open your mail: To use Gmail offline, open Chrome and go to Gmail. Or, you can use your bookmark. Send a message: If you send a message offline, it's saved in a new "Outbox" folder. If you connect to the internet, the message is sent automatically. Download attachments: You can download attachments to your computer and open them with a local application. You can't preview attachments. Use multiple accounts: You can only use Gmail offline with the account you were signed in to at setup. To enable another account for offline use, sign in to that account and follow the setup steps above. Fix issues when you use Gmail offline Your messages don't sync This issue can happen if: You run out of storage space: To fix this issue, change your "Offline" settings in Gmail. On your computer, go to Gmail offline settings. Next to "Sync settings," you can: Click the Down arrow to sync fewer days of messages. Uncheck Download attachments. You close Chrome: Your messages can only sync if Chrome is open. You get an insufficient offline storage error message When you enable offline mail, you get this message: "Looks like there is not enough space available for offline mail. This may be caused by insufficient hard drive space or a web browser mode." This error can happen if: Your hard drive doesn't have enough space. You use an Incognito window in Chrome. You use a Guest profile in Chrome. Your Chrome settings are set to clear cookies on exit. To check your settings: On your computer, open Chrome. In your address bar, enter "chrome://settings/content/siteData". Under "Always delete site data from your device when you close Chrome," make sure that "mail.google.com" or "*.google.com" doesn't show. Turn off offline mail Important: If you delete cookies, you get signed out of sites that remember you and your saved preferences can be removed. This applies every time a cookie is deleted. Step 1: Remove your offline data On your computer, open Chrome. At the top right, select More Settings . Select Privacy and security Third-party cookies. Select See all site data and permissions Delete all data. To confirm, select Delete. Step 2: Turn off offline mail Related resources Change your Gmail settings Supported browsers Post to the help community Get answers from community members I am the primary BT Mail account holder. For years, I have used two secondary accounts for my voluntary work. I have had no problems with one account, accessing it and posting from there about four days ago. But now that particular email address has gone from the list of email accounts the family holds and Each time I try to log on I get bounced back to the login screen. My emails to the address do not come back undelivered. I tried the help service, via Web Chat. I used the webchat help yesterday for 3 hours and I was assured all was in order. I was told that the account was there and visible and to login. I tried, same problem and no, the email account is NOT visible. I try with or without vpn - same result. All the family and my other accounts are working fine. The problem is just with that one account. And it doesn't matter whether I change browser or device. Same result. The password is accepted, login is attempted and quits with no message.I noticed that last year, someone else had a similar problem. Could you please assist as that account is important for voluntary work that I am engaged with. It's important.Many thanks
