Where is lifepod 2

Great Product. Better customer service I bought this Vaultek 2.0 but received the incorrect product in the mail. Contacted customer service and they immediately helped to replace the item. As for the safe, It's great. Easy to use, very portable, and fits what I need it to. Only downside is I cant stack my firearm and use the inner tray at the same time. Forums > Social > Games > Discussion in 'Games' started by Xylia, Sep 3, 2019. (You must log in or sign up to reply here.) Forums > Social > Games > LifePod expands the capabilities of popular smart speakers with a unique Proactive-Voice Platform and Caregiver Portal that provides an easy-to-use, 2-way voice service for older adults aging-in-place and chronically ill patients in their homes AND their caregivers! Unlike traditional voice assistants, LifePod can be set up and controlled by a remote caregiver using an intuitive, online portal to configure and schedule proactive-voice check-ins, reminders, and other content providing virtual companionship. Proactive-Voice LifePod initiates pre-scheduled routines, which are spoken aloud through the LifePod-Powered smart speaker. No need for your Care Recipient to remember anything – he or she simply listens to LifePod questions and reminders and responds, naturally by voice! Personalized Routines Using the LifePod Caregiver Portal, caregivers can personalize voice-first routines to support a healthy, independent and engaging lifestyle – proactively engaging your Care Recipient, via voice, with the information they need whenever they need it. Care Team Support Ease the minds of your Care Recipient's loved ones and professional care providers by adding them to the Care Team. LifePod Care Team members receive daily email reports and can opt-in to receive real-time, text alerts based on your Care Recipient's interactions with LifePod. Care Plan Adherence Reinforce medical care plans with voice prompts for medication, behavioral therapies, hydration, or appointment reminders. Confirmations that each activity has been completed provides all members of the Care Team with greater peace of mind. Social Companionship LifePod has been shown to play an important role in reducing social isolation through access to engaging online content as well as voice-first routines that helps care recipients to feel more connected with their caregivers and to participate in social events. Personal Emergency Response Service (PERS) With the addition of a MobileHelp emergency response service, care recipients can summon the help they need – from a family member or an emergency response service – if and when they need it. Smart Home Integration LifePod's unique proactive-voice capability to command your voice-activated smart home to do things for your Care Recipient. Even turning the lights on/off by voice can help older adults by saving them from having to walk across their room or apartment. Text Alerts Configure instant text message alerts to notify you about the status of high priority routines during your Care Recipient's day, such as wellness check-ins and medication reminders. Or, get the answer to one question every day texted to you so you know they're up and about and okay! Secure LifePod's platform and devices use industry-leading security methods and best practices to ensure privacy and security throughout the LifePod service. Security and data compliance protocols are routinely tested and LifePod is currently working towards compliance with HIPAA/HITECH standards for all LifePod cloud and speech solutions, data and services. LifePod helps caregivers take better care of their loved ones when they can't be there in person. Full-Size Rugged Airtight Water Resistant Storage with Built-in Lock LifePod 2.0 Colion Noir Edition. Polished from the inside out with signature printed camo, genuine leather lid organizer, and pluck foam. Pluck foam allows you to create custom fit pockets for stored contents such as a pistol and spare magazines. More Refined, Full-Size capability, and upgraded layered storage. Building on the successful LifePod platform, LifePod 2.0 can store a full-size handgun up to 9.25" long, features a removable interior tray for stackable storage, and a convenient interior LED light. Built-in lock system incorporates Vaultek's precision engineered safe technology and anti-impact latch design. LifePod 2.0 can be locked and unlocked using the touch sensitive LED keypad and the front manual keyway can be disabled to prevent lock picking. Designed to Perform. Exclusive proprietary material is engineered for superior strength, lightweight feel, and drop tested high impact protection. Side compression latches and inner rubber gasket seal off the interior from environmental factors. Submersible in 3 feet of water up to 30 minutes, airtight, dust proof, and floats. Powered by a 9V alkaline battery (not included) with a battery life of up to one year under normal use. LifePods can also be used without a battery and still function as a water resistant case. The front rubber keyhole cover disguises a hidden micro-USB port to power the unit in case of a dead battery. Included Accessories: Genuine Leather Lid Organizer 2-Pieces Pluck Foam Removable interior tray 2-pieces of velcro for attaching items to tray 3-Piece high density foam padding (2) Backup manual Keys 48" Steel security cable Weight: 3lbs 3oz Exterior Dimensions: 12.25" x 8.5" x 2.875" Interior Dimensions: 9.625" x 7.25" x 2.125" *** NO International Shipping *** ** The manufacturer does not allow coupons on this item *** in: Story, Explorable Structures, Aurora, Vehicles View source Share This article is about the Destroyed Lifepods. You may be looking for the Aurora or Wrecks. Read at own risk This article contains unmarked spoilers. Players new to the game would want to avoid or be cautious toward this article. Destroyed Lifepods are small survival vessels that were launched from the Aurora during its descent. While several lifepods survived initially, by the time the player wakes after being unconscious for three hours in Lifepod 5, it is the only one still intact, the others having sunk or been attacked. The player can receive Signals pointing to the locations of Destroyed Lifepods, or clues that give a rough idea of where to find them from the Radio. As of now, nine Destroyed Lifepods are present in-game. Most Destroyed Lifepods contain abandoned PDAs with Data Downloads, and Data Boxes left behind by their occupants. Overview Gallery Trivia In previous versions, Destroyed Lifepods all featured the same damage; it was due to a lack of art time, contrary to the theory that they were all attacked by Warpers.[1] A second Lifepod 3 had spawned in the Safe Shallows. This was removed in later versions of the game, however. The only other floating lifepod is Lifepod 4 found near the Aurora in an overturned position. It is unknown what caused it to overturn. However, it was likely caused by a Reaper Leviathan as hinted by the distress signal and overall proximity to Reaper Leviathans. References ↑ Dated June 1st, 2017.
