It's estimated that over half the world's population is \*at least\* bilingual and this figure is growing. So where do you fit into this changing world? Do you see yourself as part of a dynamic population of world citizens, or stuck on a shrinking monolingual island? The real question should be: why \*not\* learn another language? If you're at all curious about the world beyond your own day-to-day routine, speaking Turkish (or any other language besides your native tongue) can upgrade your life by increasing opportunities for career, living, travel, friendship, adventure and love. The more languages you speak, the bigger your world becomes. And there is absolutely no reason to be discouraged, or to tell yourself you don't have the talent for it. The idea that only children can become bilingual is simply a myth. You can learn to speak another language no matter your age or educational background; maybe you'll never be mistaken for a native speaker, but you will be able to communicate – and that is what languages are for. Speaking a language is about connection, not perfection. So let's ask a new question: who do you want to connect with? Learning Turkish A language is more than a bunch of words and rules for how to put those words together; it is another world. Speaking Turkish gives you access to the world of over 70 million native speakers across Eastern Europe and Western Asia. Most live in Turkey, but there are sizable populations of Turkish speakers in Greece, Germany and most countries bordering Turkey. Turkish is the most widely-spoken language Turkic language, a language family that also includes Azerbaijani, Uzbek and Kazakh. There is basically no cross-over between English and Turkish in terms of vocabulary or grammar. The language is considered harder to learn than French or German, from which English originates. However, because it uses the same Latin alphabet as English (with a few extra diacritic marks thrown in) Turkish is the easiest place to start for anyone wanting to learn a Turkic language. With Babbel, you can learn Turkish without going to classes, hiring a tutor or investing in expensive software. For an affordable monthly subscription, you have access to hundreds of hours of interactive courses that get you speaking right from the first lesson. Babbel's integrated speech recognition can even help you improve your pronunciation. We add courses on a regular basis, so the opportunities to learn and improve are always growing. And if you own an iPhone, Android, or Windows 8 phone the key to speaking Turkish is already in your pocket. Benefits Having a little Turkish in your conversational repertoire will open up the world to you on multiple levels: For Business – being bilingual isn't just good for your resumé, it can change your career. Knowing some Turkish can be extremely advantageous for anyone doing business with Turkish firms or planning to work in the country. Turkey's newly industrialized economy robustly withstood the aftermath of the 2008 financial crisis and has a rapidly-growing private sector. Because so few non-Turks speak Turkish, learning the language can give you a rare skill and make you an in-demand specialist. Traveling – Turkey's gorgeous coastlines and exotic cities offer the textbook definition of a vacation getaway. Sunny beaches, calm seas, ancient ruins, thriving markets and breathtaking architecture draw tens of millions of tourists every year. But the country is much bigger and richer than what is accessible via tourist packages and cruises. When you can speak Turkish the country opens up to you in ways that monolingual foreigners could never even guess. And because Turkish is mutually intelligible with other Turkic languages, speaking it will allow you to communicate with people from the eastern shores of the Mediterranean all the way to western China. Living Abroad – When you speak Turkish well enough to travel without a phrasebook in hand, the idea of staying longer in Turkey can become tempting. It's most populous city, Istanbul, offers opportunities for students looking for a semester abroad and professionals looking for new opportunities in a vibrant and rapidly-growing economy. Quieter corners of the country are tempting destinations for retirees in search of a low cost of living and warm climates. Brain Training – Even if you decide to only learn Turkish as a hobby, knowing multiple languages will keep your brain healthy and nimble, even in old age. This is because knowing another language creates another network of connections among your neurons. The higher your neural interconnectivity, the better your memory and problem-solving skills. Turkish Culture, Unfiltered – Turkey is a transcontinental country – occupying territory in Europe and Asia – with one foot firmly set in Western traditions and the other in Eastern ways of life. As a culture, Turkey is a fascinating hybrid of cultures from two continents. Whether you want to be able to sing along to all of Tarkan's love songs, get into Turkish psychedelic folk music, learn to belly dance, study Ottoman architecture, or learn how to make your own Türk lokumu, speaking Turkish will let you participate more directly. Knowing the language will also give you unfiltered access to Turkish literature and cinema. And if you have Turkish roots, learning the language will help you to illuminate your heritage. Ways to Learn Turkish Although Turkish isn't a widely-studied language in the United States there are still many ways to learn it: In The Classroom Classroom instruction with a teacher and other students is the most traditional approach to learning a language. Many Americans have already learned a language this way in high school, although often not with the best results. Many people who are motivated to become fluent find that classes offer a good balance between language instruction and chance to listen and speak. Private Tutor Learning one-on-one with a tutor allows for a completely tailored learning experience and more opportunities to practice speaking. Compared to a classroom where the teacher has to split attention among dozens of pupils, private tutoring usually yields quicker results. However, private tutoring doesn't come cheap; you'll need to be prepared to pay a high hourly rate for an experienced tutor. Audio Courses and CD-roms For people with money to burn on learning a language, but not enough time to commit to traditional methods, multimedia courses are a good alternative – whether you practice listening and speaking with CDs in the car, or use interactive courses on your home PC in your free time. The main drawback to these methods is high up-front cost and material that can quickly become outdated. Online Turkish Courses Online learning has made immense progress in the past several years and has become a viable alternative to more traditional forms of instruction. It's becoming the norm for people with very little time or money to spare who still want to make progress with their learning. Compared to the above method, subscription-based online programs are always updating, improving and adding courses that don't require buying a new module. To Pay Or Not To Pay? What do the methods mentioned above have in common? They all cost money. For thrifty folks who have a little more patience and motivation than the average learner, there ways to learn Turkish for free: Tandem Partners Tandem learning is a technique where two people who want to learn each other's languages take turns as teacher and as student. For example: if you meet for two hours, you can speak in Turkish for one hour and then switch to English for the next hour so that you both get some practice. But be aware, just because someone is a native speaker does not mean they are a good teacher. This can still be a good option once you already know some Turkish and just want to practice, but you must be prepared to teach your counterpart English. Tandems are free for both parties, but a significant time commitment. Immersion OK, so it's only free if you don't count the airfare or room and board, but nothing helps you become fluent like living in Turkey. But immersion is no magic bullet. If you haven't arrived with at least some knowledge of Turkish vocabulary and grammar, passive listening will not be easy and will not make you fluent without further study. Before taking the big plunge, you can simulate immersion by streaming Turkish radio and TV online, watching Turkish movies and doing multimedia lessons online. Library Books If you are a real self-starter then you don't need more than a Turkish grammar book, dictionary and some vocab books to start learning the language. Books could get you reading Turkish after lots of studying, but won't help with listening comprehension or speaking. Free Online Courses and Mobile Apps There are hundreds of ways to learn Turkish for free on the web. From Turkish grammar wikis to online courses, there's no shortage of information out there, but it's often presented in a cluttered and inconsistent way that's harder to read than a grammar book. Some websites offer free interactive learning material, like Duolingo and Memrise, but programs like these focus on writing and reading at the expense of listening and speaking. They also rely heavily on user-generated content, which means the quality is inconsistent and the accuracy of the information goes unverified. It's possible to learn Turkish online for free, but be prepared to deal with language lessons that are dull, inflexible, too basic, poorly designed, or else littered with ads. Learning Turkish with Babbel Learning with Babbel costs you less per month than your morning coffee, is ad free and has been made by a team of language experts, educators and designers – so you are guaranteed a top-quality learning experience for the best value. I ask this because I figured the subcontinent would be essentially the same but Sri Lanka, India and Bangladesh are so different from each other in many ways (I like Bangladesh most because there were no tourist so there were no touts- I can't stand touts- so I made genuine local friends easily.) 1andrewsmithTue, 12 Jan 2010 14:51:05 +0000It all depends on patience and communication skills. If you demand people speak english then the S Caucasus is the wrong place for you. In India and Bangladesh you probably found english speakers most places. That won't happen in Georgia, Armenia or Azerbaijan. You will find English speakers in top end hotels and working as guides for tour companies. Some younger people have a command of English, perhaps 1 in 20 could hold a short conversation, and most of these are to be found in the cities. Russian, on the other hand, is well spoken in all of these countries, especially Armenia. Any male over 40 years old is fluent in Russian thanks to national service in the read army. So, what happens if you fetch up with none of the local lingo? The answer is - you can get by but with many misunderstandings. You'll regularly get lost, miss buses and trains, turn up at museums and hotels that are shut etc etc. If you've a tolerance for this, then fine. Otherwise, either buy a russian phrase book and practice lots, or get a tour agency to help. Phrase book is cheaper. 2lebourneTue, 12 Jan 2010 21:02:20 +0000Outside of the capitals, it will certainly be challenging, a tip: look for young people wearing glasses, for some reason, they always tend to speak some english, and it's true in most countries in the world. 3confidentMon, 01 Feb 2010 08:20:31 +0000great notice!! And actually is true... Not a clue how speak English in Armenia but in Tbilisi and especially Baku 1 of 10 can help you if you apply to them. In countryside you definitely hardly find anyone speaking normal English. I have a travel agency in Baku. If you need any assistance please feel free to contact me.. 4tiemTue, 02 Feb 2010 06:27:03 +0000guitoudebuch- haba very funny and true. I find also that students are sweet trustworthy people. 5lynekaMon, 08 Feb 2010 20:26:29 +0000I believe getting lost or could not be able to communicate is one of the charms of travelling with a backpack and phrasebook. Locals need to understand you to help you. I am planning a trip to same area this May. I am not worried about AZ as I am Turkish and Azeri language is a dialect(?) of Turkish language. Mainly I am worried about Armenia. I could not speak one word Russian. Well, maybe one word: Da. :) I guess, it is going to be a challenging trip. guitoudebuch, your remark is spot on. Young people are always great help. If they cannot help you, they find the person to help you. 6theredoctoberMon, 15 Mar 2010 02:03:26 +0000I went to Georgia a few years ago and most people speak Russian fluently. That goes for all former Soviet nations. Learn some basic Russian words and expressions before you go, it'll really help you . 7theredoctoberMon, 15 Mar 2010 02:05:56 +0000oh and you'll be delighted to know that in none of those three countries touts are frequent. Most people will genuinely be interested in you and invite you for dinner or drinking.
