Inventory Usage/ Product Sales Analysis Reports

Overview
This Extended Solution to the Inventory Management module adds the Inventory Usage Report and the Product Sales Analysis Report. The Inventory Usage Report tracks stock and usage information for individual items and compares items from completed sales to a user-defined time period. The Product Sales Analysis Report tracks sales from the beginning of the fiscal year to the end of the fiscal year.

Installation
Before installing this Extended Solution, please verify that the version levels printed on the CD-ROM are the same as the version levels on the PC. The installation program will install automatically. First, find the software on the CD-ROM drive and double-click it to start the installation program. Follow the on-screen instructions.

Running Your Extended Solution under Windows
When you start the Extended Solution, you will see a screen with the following information: Product Name, Customer Name, and a user-defined password. If you do not have a user-defined password, you will see a screen with the following information: Product Name, Customer Name, and a user-defined password. If you do not have a user-defined password, you will see a screen with the following information: Product Name, Customer Name, and a user-defined password.
