Have this procedure along with the rest of the domestic, Asian, and European manual maintenance reset procedures always at your fingertips with our mobile app Oil Reset Pro available on the Apple and Google Play stores. Follow links below to download from the store for FREE now! Learn how to reset the oil change light in the Mercedes-Benz Sprinter by following one of the uniformed options below. *TIP: After each oil change and new filter, the maintenance oil light indicator should disappear automatically. However, if it does not, it will need resetting for effective performance. Additionally, this indicator is included to alert you if there is a problem with the vehicle's oil and is NOT to be ignored! If the warning is not addressed, this can lead to other unexpected costly engine issues. **NOTE: If you are unable to reset the oil change notification light on the first try, REPEAT the steps. If you are still unsuccessful, contact the dealership for assistance or consult your vehicle user's manual. ContentsOPTION 1OPTION 2: For Models With Steering Wheel Controls OPTION 1 Turn the key to the ON position. DO NOT start the ignition. Wait until you see the total mileage on the display screen before proceeding. Press and HOLD the O button located in the RIGHT bottom corner of the Dash Screen/Instrument Cluster for about Thirty Seconds until you hear a BEEP. Press the M button until you see either rRESET .31 or rRESET .51 (See image below) Or for older models, you may see rESET 229.5 or rESET 229.3 on your display screen. PRESS and HOLD the O button again until you see the number TWO. Once this number pops up, you can Release the button. For Models With Steering Wheel Controls Turn the key to the ON position. DO NOT start the ignition. Wait until you see the total mileage on the display screen before proceeding. If the mileage does not show up, press the UP Arrow on the LEFT side of your steering wheel until the mileage is visible. Continue to press the UP arrow until you see Service A Overdue By xxxx miles / Service A in xxxx Miles or Service B Overdue By xxxx miles / Service B in xxxx miles on the display screen. Press and HOLD the O button (See First Image) for about 30 Seconds until you hear a BEEP. Press the MENU button on the steering wheel. Now press the UP arrow on the steering wheel once more until you see Service A overdue by xxxx miles / Service A in xxxx miles or Service B overdue by xxxx miles / Service B in xxxx miles on the display screen again. Press the O button again. Press the UP arrow until you see a message which says CONFIRM COMPLETE SERVICE. Press and HOLD the O button for about THREE Seconds to set. You will then see SERVICE CONFIRMED on the screen. The Warning Light Should Disappear! Comstock/Comstock/Getty Images An on-board diagnostics system tracks when regular maintenance should b done on the Mercedes Sprinter Van. The system triggers a "Service Soon" light that appears on the Sprinter's dashboard display when the vehicle needs to be serviced. The great thing about the Mercedes is that you don't need any special tools to reset the warning light. However, you do need to have the Sprinter serviced or do the work yourself before you can manually reset and turn off the vehicle's warning light. Put the key into the ignition and turn it to the "On" position, but don't start the engine. Look for the display between the tachometer and the speedometer on the instrument panel. Press the button on the lower left part of the steering wheel. The display panel will tell you why the vehicle needs servicing. Find and press the reset button on the left side of the instrument panel. Hold this button for three seconds. Press the reset button again and hold it until the display says it has been reset. Turn off the vehicle and wait 60 seconds. Turn on the engine and verify that the service light has turned off. Sep 08 Automotive. How To Fridays Instrument Clusters Steering Wheel Controls *Oil Specification Codes Diesel engine with long oil change interval: Qual. 229.51 (older instrument clusters 229.5) Diesel engine with short oil change interval: Qual. 229.31 (older instrument clusters (229.3) Gas engine with long oil change interval: Qual. 229.5 Gas engine with short oil change interval: Qual. 229.3 The Oil Change Light Reset Mercedes-Benz Sprinter 2500 2010 2011 2012 2013 2014 2015 will need to be performed after every oil change. If it is not reset the system will be unable to properly track when your next oil change is due. Below is the Oil Change Light Reset procedure for the Mercedes-Benz Sprinter 2500 2010 2011 2012 2013 2014 2015. Follow the steps below to reset the oil life monitor after each oil change. Oil Change Light Reset Mercedes-Benz Sprinter 2500 2010 2011 2012 2013 2014 2015 Procedure Without Steering Wheel Controls Turn the ignition on, do not start engine. Wait for odometer to be displayed. Press and hold "0" button for 30 seconds until a beep is heard. On diesel engines with long oil change interval, press "M" button repeatedly until "rESET .51/rESET .31" will be displayed. On older instrument clusters, "rESET 229.5/ rESET 229.3" will be displayed with oil can symbol. Press and hold "0" button for 3 seconds. Release button and press again. Turn the ignition off. With Steering Wheel Controls Turn the ignition on, do not start engine. Wait for odometer to be displayed, press double square button repeatedly to display if not done automatically. Press the up or down arrows repeatedly until "SERVICE SCOPE X IN XXX KM" is displayed. Press and hold "0" button for 30 seconds until a beep is heard. Press double square button. Press the up or down arrows repeatedly until "SERVICE IN XXX KM" is displayed. Press "0" button, "CARRY OUT" will be displayed. Press the "+/-" buttons repeatedly until "OIL TYPES" is displayed. Press the "+/-" button repeatedly until desired oil specification is highlighted. Press the up or down arrow to select. Press and hold "0" button for 3 seconds until "SERVICE CONFIRMED" is displayed. Press the up or down button to display "New service scope. Turn the ignition off. Oil Viscosity and Capacity The 3 Diesel liter engine holds approximately 13.2 quarts (12.5 liters) of 5W-40 oil when the engine oil and filter are changed. The 2.1 Diesel liter engine holds approximately 12.2 quarts (11.5 liters) of 5W-40 oil when the engine oil and filter are changed. Not Working? If the oil change light reset procedure is not working to reset your oil life monitor, make sure you are following each of the steps exactly and in the order displayed in the Oil Change Light Reset Mercedes-Benz Sprinter 2500 2010 2011 2012 2013 2014 2015 procedure above. If this is not the oil life monitor reset procedure for your vehicle, restart your oil light reset procedure search HERE Oil Life Monitor Reset Procedure Frequently Asked Questions If you are still having trouble with visit the Oil Life Monitor Reset Procedure Frequently Asked Questions (FAQ) page for more information. Notice Due to the wide range of vehicles makes and models, this is general information and should not be taken as specific to any vehicle. Please consult the vehicle manufacturer for the correct specifications and repair procedures for your vehicle. This information is meant to be used as a guideline only. Just did an oil change but shop didn't reset my service counter. Now I'm too far away to go back and let them do it. I tried search the ways to do on my own but couldn't find any useful. Anyone got idea how to? I have 2019 Sprinter 2500 with basic display/controls. Thanks in advance! Sent from my iPhone using Tapataik I've been trying to figure this out for some time now. The 2019s are not like the 2018s for resetting the service counter. If you did pay to get the work done, just call them and explain the situation. It is possible they just forgot to do it, but it might also be that they are not capable yet. The only way you will know is to talk to them. I somehow lucked out when I did the service on the new sprinter at work, the counter still had over a year left before needing an oil change, which is defiantly way longer than it should have said. Yea I've contacted the shop but the thing is when I figure out I'm 2000km away from them LOL. Now I'm constantly having warning saying I've passed my service for xxx km. Will that affect anything other than annoying? Sent from my iPhone using Tapataik I don't think that should affect anything. It is just a counter. DEF warnings on the other hand can cause a no start condition because that is emissions related if ignored. Any update on howto reset it? I asked a Mercedes tech today, he gave me a print out of how to do it for our 2019 Sprinter, without any steering wheel controls. I will scan it later, but it can be done through the cluster. I haven't tested it yet, but will be in a few more months probably. Please share your result. If possible can you share the print out? Thank you! Sent from my iPhone using Tapataik I asked a Mercedes tech today, he gave me a print out of how to do it for our 2019 Sprinter, without any steering wheel controls. I will scan it later, but it can be done through the cluster. I haven't tested it yet, but will be in a few more months probably. Every car seems to have a "Back Door" for clearing these messages. Usually, it involves the ignition in several different positions, operating other switches, burning some incense, etc., but it gets the message to go away. I love forums for stuff like this. The Volvo dealer gets \$170 to electronically adjust the stop on the auto-closing windows. It's a three step process that takes 30 seconds without any hardware, once you know the sequence. Grrrrrrr. Thanks for pursuing this to a solution. We all look forward to you posting it! Jack 2019 4x4 M2CA7X (170 Cargo 2500) Seattle-ish, WA You can reset the 2019. It's on YouTube now. Here is what the localish MB dealer gave me. This is for a base model, so no buttons on the wheel, so I think it should work for most, if not all 2019s. Was anyone able to figure this out? The print out from turodoggy is for prior to 2019 vans. Basically it is the way I did the reset with prior years, but the 2019 doesn't have the buttons in the screen. I have a 2019 MB Sprinter Cargo base model. I looked at a bunch of videos, but I am stuck attempting to reset the system after its first oil change. Once I get to the Assyst Plus screen and click on it, I get A Service due but cannot go beyond that screen. Hello. The printout I attached is for 2019 vans without steering wheel controls and maybe other options. I've used it to reset the first reminder on a 2019 before. Older vans use a similar but different method. I think the method can change with options. Close all doors, and hood. Push the Start button, without pressing the brake. Press the Back button (U shaped arrow next to the OK button) to get to the screen that says "Total Distance" Press the Back button and hold it for 2 seconds, and then press the OK button. If I remember correctly, you press the OK button while still holding the Back button. This should bring up the service data screen (Workshop menu) Use the arrow keys to select the ASSYST PLUS and press the OK button Use the arrow keys to select FULL SERVICE and press OK Use the arrow keys to select SERVICE and press OK Use the arrow keys to select which oil you used. It will probably be 229.52 (but I think the display might only show the last two numbers 52). Press OK Use the arrow keys to select YES and press OK Use the arrow keys to select CONFIRMATION and press OK Press the Back button until you get back to the Total Distance screen Press the Start button to turn everything off. The hardest part was to get into that service data screen, which I think took me a few tries. I do think the order of everything was very specific, and it is also import to have everything closed. Turodoggy: I am truly grateful! Thanks to your detailed instructions, I was able to finally get this done. You earned your good samaritan points today. God bless! I forgot to add that the key point that you mentioned (and that no video showed) was This fact: "Press the Back button and hold it for 2 seconds, and then press the OK button." Every video that I saw said to press them together at once, but the only thing that happened when I did that is that it would reset the millage, but didnt send you to the workshop menu. I had to figure this out last year. Delivery vans rack up a lot of miles, and we change the oil early with the extra idling. I had a hard time finding anything. This is way overly complicated just to reset a reminder. Turodoggy: I am truly grateful! Thanks to your detailed instructions, I was able to finally get this done. You earned your good samaritan points today. God bless! If you hit the "Thanks" link at the bottom of turodoggy's post he/she will be rewarded with actual 'good samaritan points' recorded in the forum's meta data. -- 2017 Sprinter 2500 170 Crew OM642 5-speed auto with Adventure Wagon interior&MOAB
